

Public Notice Submission

Provider Name: Poka Lambro Telephone Cooperative/ Poka Lambro Telecommunications

Summary: Poka Lambro Telephone Cooperative and its affiliates provides Broadband services to almost all of the proposed areas. All of our central offices and two-thirds of our wireless internet sites are fed by fiber optic equipment. Poka Lambro has implemented and deployed fiber to the home technology which will provide very high bandwidth to those communities. We have added and are continuing to add fiber fed remote terminals to provide the highest speed possible to remote rural areas. Our Wireless systems cover territory beyond our regulated borders and with our copper, fiber and wireless solutions, Broadband access is available throughout the entire proposed areas and beyond. With over 20 Central Offices and fiber remotes as well as half again as many wireless access sites, Middle Mile services are very adequate for the area.
