7. Please describe how your Public Computer Center(s) promotes economic recovery in your area, such as through providing job training, access to job searches, online course offerings, certifications and the like (600 words or less).

Thomas Edison State College's New Jersey Libraries project has added 845 computer workstations at 125 NJ public libraries, upgraded broadband connectivity at 91 NJ public libraries, and is providing job search assistance, employment skills, workforce development programs, and other online resources at all public libraries across the state. Many of New Jersey's unemployed residents are seeking to adapt to a job market in which access to computers and broadband are requirements for most, if not all, job searches, employment applications, and workforce skills training. In many New Jersey communities, the public library is the only place that offers the public free use of computers and Internet access. Many libraries, however, are unable to keep pace with the demand for broadband access. A consortium led by New Jersey's community colleges have, and are currently, delivering training using its existing curriculum tailored to the skills needed by library staff and job seekers.

8. To the extent that you have made any subcontracts or sub grants, please provided the number of subcontracts or sub grants that have been made to socially and economically disadvantaged small business (SDB) concerns as defined by section 8(a) of the Small Business Act, 15 U.S.C. 647, as modified by NTIA's adoption of an alternative small business size standard for use in BTOP. Please also provide the names of these SDB entities (150 words or less).

9. Please describe any best practices / lessons learned that can be shared with other similar BTOP projects (900 words or less).

- Develop a cohesive team early on in the project, allow each person to provide expertise in different aspects of the project

- Designate one person to be completely focused on developing, implementing, and executing major tasks involved in the project - Build and foster key partnerships; for the New Jersey Libraries project, we developed a partnership with the Community College Consortium to develop and deliver job readiness courses to the public within public libraries, which has allowed for training to be delivered in over 300 libraries across the state

- Webinars seem to be more effective in delivering to library staff, who are limited on staff and resources. Although some in-person workshops were scheduled, we did schedule several webinars that received much higher attendance.

- Identify realistic timelines in the planning stages of project - attempt stay on target with planned milestones; allow for room for changes and revisions. For this project, we planned for the project to be completed in 2 years, allowing us a year to make changes and revisions as needed.
