Number of Providers Identified 0	Number of Providers Co 0	ntacted	Number of Agreeme Reached for Data S 0			Numbe Comple	ete Data Sets	Numbe Data S 0	er of ets Verified
 10d. If so, describe N/A 10e. If you are colle activities to be Effective June 8, 21 engaged a new coll activities, as outline agreements with peroviders and Comphase of mapping past, all in preparation 10f. Please describe The following verification of the second second	 10c. Have you encountered challenges with any providers that indicate they may refuse to participate in this project? Yes No 10d. If so, describe the discussions to date with each of these providers and the current status N/A 10e. If you are collecting data through other means (e.g. data extraction, extrapolation, etc), please describe your progress to date and the relevant activities to be undertaken in the future Effective June 8, 2012, the Virgin Islands Public Finance Authority (VIPFA)/viNGN, Inc. d/b/a Virgin Islands Next Generation Network engaged a new contractor/vendor, BroadMap, LLC, to support its efforts to continue to submit provider data and to implement related activities, as outlined in its Supplemental Application. Given the change in vendor, focus is being placed on signing new nondisclosure agreements with providers; through BroadMap, LLC's data collection and analytic tools, collecting, verifying and mapping data from providers and Community Anchor Institutions (CAIs) that worked with VIPFA/viNGN's former project team and the vendor for the first phase of mapping activities, Stratum Broadband, LLC; and building relationships with providers who were reluctant to share data in the past, all in preparation for the October 1, 2012 data submission. 10f. Please describe the verification activities you plan to implement The following verification activities are planned for deployment during subsequent quarters: 								
** Middle Mile and Last Mile Location Verification/Inspection: VIPFA/viNGN, in collaboration with BroadMap, is developing a verification plan for middle mile and last mile locations; - Due Date: 12/31/2012; and ** Third Party Data Analysis: VIPFA/viNGN, through BroadMap, expects to use third party data analysis to verify provider data and will									
assess the feasibili 10g. Have you initia 10h. If yes, please o The following valid Validation: ** Provider Portal:	ity and value of ted verification describe the stat ation and verifi VIPFA/viNGI	of availa activities tus of yc fication N and E	able sources for ver s? •Yes No our activities activities have bee BroadMap, LLC dep	ificati n con	on; - Due Date: 09/3	0/2012.	the provider	s, which	allows them to

Verification:

** Submission Comparison: For the last data submission that was made, all data was compared against the previous submission to ensure that all differences were those that were expected and that no data regression was identified. This information was verified.

**Crowd Sourcing: The public interactive map was released, providing the capability of collecting additional speed test results, as well as collecting direct feedback from the public. This information will be cross-referenced with the providers' coverage footprints and attribution, and discrepancies and/or questions will be presented to the provider to ensure that their coverage and speed data is represented correctly.

**Community Anchor Institution (CAI) Portal: A web application has been deployed to enhance and maintain the CAI data inventory, verify their broadband availability, and run speed tests. The information that is collected from and through the CAIs will be used to further verify the provider coverage areas and speeds.

10i. If verification activities have not been initiated please provide a projected time line for beginning and completing such activities

As outlined in section 10f above, the additional verification activities planned for implementation are listed below, along with the planned completion dates:

** 3rd Party Data Analysis: VIPFA/viNGN, through BroadMap, expects to use third party data analysis to verify provider data and will assess the feasibility and value of available sources for verification; - Due Date: 09/30/2012.

** Middle Mile and Last Mile Location Inspection: VIPFA/viNGN, in collaboration with BroadMap, is finalizing a verification plan for middle mile and last mile locations; - Due Date: 12/31/2012.

Staffing

10j. How many jobs have been created or retained as a result of this project?

0.63

10k. Is the project currently fully staffed? •Yes ONo

10I. If no, please explain how any lack of staffing may impact the project's time line and when the project will be fully staffed

10m. When fully staffed, how many full-time equivalent (FTE) jobs do you expect to create or retain as a result of this project?

1 FTE retained; Also, VIPFA and viNGN have and will continue to allocate additional project management, oversight and operational resources to the project, which will not be funded under the Federal grant.

10n. Staffing Table

Job Title	FTE %	Date of Hire
Quality Control (QC) Specialist	1	03/22/2010
Data Sourcing Manager	6	11/30/2009

Hardware / Software

10u. Has the project team purchased the software / hardware described in the application?

10v. If yes, please list

Under the contract with BroadMap, LLC, the hardware and software that have been purchased to continue implementing the project with the Supplemental Award are the following:

Hardware:

** Webserver Hosting Services: To support the public facing website, the Provider Portal, and the CAI Portal - Cost: \$7,008

Software:

** Ookla Speed Test software: Speed testing software to embed into the public facing website - Cost \$3,000

For the initial phase of the project, VIPFA, through Stratum Broadband, LLC, purchased equipment and software to perform the Phase I Broadband Planning and Mapping tasks, as outlined below:

** Equipment: HP Z400 workstation with MS Windows OS and ESET NOD 32 AntiVirus

** Application Software: ESRI ArcEditor and ESRI ArcGIS Data Interoperability Single Use License

Under the contract with Stratum Broadband, LLC for the initial phase of the project, Stratum also provided equipment for hosting the State's/Territory's website display, as outlined below:

** Equipment: HP DL 180 GS Server with RedHat Linux OS and Apache Server

** Application Software: contractor-developed software

During Quarter 1, CY 2011, VIPFA/viNGN purchased the following hardware and software to bring the development and production environments for data mapping in-house:

Software:

** ESRI ArcInfo: \$11,382.00

** ESRI ArcGIS Data Interoperability Single Use License: \$ 2,032.00

** 2 ESRI ArcGis Server License Development: \$ 32,520.00

These products are directly attributable to performing work on the project and providing a testing and staging area for data before making it available to the National Telecommunication and Information Administration (NTIA) and the public.

10w. Please note any software / hardware that has yet to be purchased and explain why it has not been purchased

A list of hardware, software and data planned for acquisition and the anticipated timelines for the purchases is included below. The anticipated purchases and the anticipated timelines for the purchases are based on the draft revised Detailed Project Plan which is undergoing further refinement prior to being submitted to NTIA during Quarter 3, CY 2012. The cost of all hardware and software will be provided in subsequent reports.

Hardware:

- ** Probe Measurement Devices for Android Phones: For testing wireless broadband Timeline: September/October 2012
- ** Qmapper Application Automated Bandwidth: Hardware/software that is utilized in conjunction with field analysis and reporting Timeline: August/September 2012

** Mobile Phones and related Phone Plans for Wireless Services: For the collection of data, the verification of coverage and the testing of speeds

Timeline: September/October 2012

** Early Termination Fee: In order to save money, the above-mentioned data plans contracts will be canceled after verification tests are completed.

Timeline: October/November 2012

** Esri Laptop with ArcInfo License: To perform ArcGIS tasks Timeline: To-be-determined

Software:

** ArcGIS Server GIS Software: For the deployment of web-based GIS mapping for the public facing website, the Provider Portal, and the CAI portal)

Timeline: September/October 2012

** ArcGIS ArcView License GIS: Software needed for data manipulation and processing Timeline: August/September 2012

** EDX Signal Propagation Software: For use in verification and mapping of wireless coverage

Timeline: August/September 2012

Data:

** MapConnect Enterprise: For displaying and geocoding data used as the basemap for the public facing website, the Provider Portal, and the CAI Portal

Timeline: August/September 2012

10x. Has the project team purchased or used any data sets? OYes ONo

10y. If yes, please list

The Google Earth and CAD data provided as In-Kind contributions from the U.S. Virgin Islands Water and Power Authority (WAPA) have all been received and used extensively during the identification and location of Community Anchor Institutions (CAIs)/anchor tenants, towers, and other points of interest. Avensa MAPdataUSA was purchased at the beginning of the project as an aid in broadband planning.

10z. Are there any additional project milestones or information that has not been included?
()Yes ()No

10aa. If yes, please list

Activities under the following sub-projects are being planned, and the timelines for the final completion of these activities are as follow:

** Smart Grid Planning and Testing: 12/31/2014

** Public Safety LTE Broadband Capacity Planning and Support: 12/31/2014

** Street Address Normalization: 12/31/2014

10bb. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing

While some local providers have provided data, the team has had some difficulty in obtaining bandwidth and speed data from other local providers. To mitigate this obstacle, viNGN and BroadMap are conducting one-on-one meetings and conference calls with providers to emphasize the importance of receiving and mapping their data to economic and community development, to assure providers of the confidentiality of their source data and to encourage them to support the national broadband mapping initiative.

10cc. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project

N/A

11. Broadband Planning

11a. Please describe progress made against all goals, objectives, and milestones detailed in the approved Project Plan. Be sure to include a description of each major activity / milestone that you plan to complete and your current status

viNGN and BroadMap have made significant progress by meeting with some of the local ISPs (including Innovative, Choice, and SmartNet) one-one-one to emphasize the importance of receiving and mapping their data to economic and community development, to assure providers of the confidentiality of their source data and to encourage them to provide detailed and timely bandwidth, speed data and other information for the national broadband mapping initiative through the viNGN/BroadMap Provider Portal.

The VIPFA/viNGN/BroadMap team has also met with partners who are responsible for the various sub-projects, including the U.S. Virgin Islands Water and Power Authority (WAPA) with regards to assisting with planning and testing under its Smartgrid project and the U.S. Virgin Islands Office of the Lieutenant Governor with regards to assisting with its Street Address Normalization project.

11b. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing

N/A

11c. Does the Project Team anticipate any changes to the project plan for Broadband Planning? •• Yes •• No

11d. If yes, please describe these anticipated changes. Please note that NTIA will need to approve changes to the Project Plan before they can be implemented

Changes to the project plan are primarily related to the need to reschedule activities, given the National Telecommunication and Information Administration's recent approval of the new contractor/vendor that will support the implementation of activities under the

Supplemental Phase of the award and based on follow-up discussions with the Supplemental/Phase II contractor/vendor and the subproject partners. Following additional planning discussions with the U.S. Virgin Islands Water and Power Authority (WAPA) with regards to assisting with planning and testing under its Smartgrid project and the U.S. Virgin Islands Office of the Lieutenant Governor with regards to assisting with its Street Address Normalization project and following discussions with the various local public safety entities with regards to public safety planning and the use of LTE technology, the VIPFA/viNGN team will further modify the Detailed Project Plan. The team expects to submit the revised Detailed Project Plan during Quarter 3, CY 2012.
