During this quarter	, the Connect	Kansas	s project has receive	d a t	otal of 31 broadband	d inquiries	s. Additiona	l inform	ation received through	

e-mail from consumers that can also be used for verification purposes totaled 13 for this quarter.

Connected Nation has completed 235 in-field data validation tests of 54 companies totaling 52.43% of the broadband provider universe within the state of Kansas. Activities and field validation techniques included (i) on-site visits with providers; (ii) verifying wireless frequencies through the use of spectrum analysis testing; (iii) cross-referencing the physical coordinates of remote terminals, fiber nodes, ILEC central offices and FTTx routes against information available from the public domain, and through field testing with GPS enable software and handheld GPS units; (iv) digital photography of facilities; and (v) random throughput speed tests compared against Maximum and Average speeds as reported by the broadband providers.

10i. If verification activities have not been initiated please provide a projected time line for beginning and completing such activities

N/A

Staffing

10j. How many jobs have been created or retained as a result of this project?

Connected Nation has numerous staff working on this project, some at only a small percentage of their time. This approach is beneficial to the project in various ways: some staff provide necessary project support, many staff work together utilizing a team approach, and others are subject matter experts in their respective areas and by leveraging their expertise the project benefits by their knowledge and skills without the necessity of supporting a more expensive full-time resource.

10k. Is the project currently fully staffed? Yes No

10l. If no, please explain how any lack of staffing may impact the project's time line and when the project will be fully staffed

The positions not currently staffed are related to the new broadband capacity activities that are only just beginning and as such have no impact on the project's time line. The positions are expected to be filled during the first and second quarters of 2011.

10m. When fully staffed, how many full-time equivalent (FTE) jobs do you expect to create or retain as a result of this project?

4.57

Hardware / Software

10u. Has the project team purchased the software / hardware described in the application?

10v. If yes, please list

Hardware/software purchases for the project to date include the following:

- BroadbandStat-\$60,000
- ArchInfo/ArcGIS Software-\$4,322
- Computers-\$3,584
- Metrics Speed Test Software-\$4,112
- Spectrum Analyzer-\$5,323
- GPS Unit-\$250

10w. Please note any software / hardware that has yet to be purchased and explain why it has not been purchased

Remaining purchases may include SQL server for mapping geodatabase, SQL server software, multiple dedicated storage servers, security application, additional backup replication solution, computers, GPS units BroadbandStat maintenance, ArchInfo/ArcGIS maintenance, and speed test updates as well as computers and software maintenance.

10z. Are there any additional project milestones or information that has not been included? • Yes • No
10aa. If yes, please list *Maintained the hudget/finance cost model for Connect Kansas
*Maintained the budget/finance cost model for Connect Kansas *Continued to monitor and maintain the project work plan and Work Breakdown Structure
*Continued to reach out to all Kansas providers for data collection
*Maintained the Connect Kansas website to explain the program and gather information from the consumer community *On October 29, 2010, the Kansas Providers Advertised Speed Maps were uploaded onto the Connect Kansas website
*Maintained the Kansas BroadbandStat instance
*Continued to process speed tests and website broadband inquiries from the Connect Kansas speed test portal *Conducted the first Kansas Broadband Summit on October 24 and 25, 2010
*Maintained the outreach and awareness strategy plan
*Conducted periodic Connect Kansas project team meetings
*Produced monthly status reports, data collection activity log, and website statistics and distributed to the Connect Kansas project team *Maintained the broadband provider list *Distributed and report to the connect Kansas project team
*Distributed and securely stored executed Non-Disclosure Agreements *Conducted webinars and demonstrations of the BroadbandStat product
*Updated and processed broadband coverage coordinate data sets from provider community
*Submitted the Connect Kansas 3rd Quarter 2010 American Recovery & Reinvestment Act and National Telecommunication and
Information Administration (NTIA) Performance Progress Reports
* Connect Kansas continued to conduct on the ground field validation for the NTIA viable Kansas providers *Continued working on the Connect Kansas State Broadband Data and Development amendment project planning and budget plans
* Completed the final Kansas residential survey report and presented the report to the Kansas Department of Commerce
*Completed the initial Kansas business Survey Short report and presented the report to the Kansas Department of Commerce
*In response to the additional State Broadband Data & Development funding extending the grant through December 2014, project plan
alterations and expansion commenced 10bb. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing
1000. Please describe any challenge of obstacle that you have encountered and detail the militigation strategies the project team is employing
N/A
10cc. Please provide any other information that you think would be useful to NTIA as it assesses your Broadband Mapping Project
On September 27, Connect Kansas received notice of a grant award extending SBDD mapping and planning activities for an additional three years. The project plan has been revised to include these new activities and will be formally submitted to NTIA by the scheduled deadline.
11. Broadband Planning
11a. Please describe progress made against all goals, objectives, and milestones detailed in the approved Project Plan. Be sure to include a description of each major activity / milestone that you plan to complete and your current status
The Kansas Broadband Planning Manager and staff of the Kansas Department of Commerce organized the first Kansas Broadband
Summit on October 24-25 in Wichita. A total of 18 Kansas Broadband Task Force members attended the Summit. In total, over 200 people participated in the two day event. While Task Force members attended the Summit, an additional Task Force meeting was not
held this past quarter as state staff awaited direction from the incoming governor's team. The Broadband Manager continues to
organize state-funded broadband activities and is prepared to implement components of the amended grant award in the next few
quarters. The state is waiting for Task Force input before finalizing scope for university surveys. The state is working to finalize a
contract with CostQuest Associates for a network cost model with the intention to begin the project this quarter, pending NTIA approval of the contract. The State of Kansas and Connected Nation worked during the quarter to begin the process of gathering information for
the State's submittal of additional information regarding the amendment to SBDD.
11b. Please describe any challenge or obstacle that you have encountered and detail the mitigation strategies the project team is employing
One challenge in the planning process has been prioritizing the large scope of the project and getting initial capacity built to execute
the planning effort. One additional challenge is ordering the sequence of funded activities to most effectively implement the Connect Kansas program and make the most impact. For example, now that the Kansas Broadband Task Force is officially up and running,
they will want to influence decisions regarding surveying and cost modeling efforts. The State mitigated the hiring challenge by
utilizing in-kind labor match from current staff, and is mitigating other process issues with state purchasing officials.
11c. Does the Project Team anticipate any changes to the project plan for Broadband Planning?

11d. If yes, please describe these anticipated changes. Please note that NTIA will need to approve changes to the Project Plan before they can be implemented

One potential change may involve a shift in the timeline for projects funded by the SBDD. For example, the Kansas Broadband Task Force may want to delay implementation of survey work until they have time to decipher the mapping data to make an educated decision on program direction.
