Authentication and Certifications

1. I certify that I am the duly Authorized Organization Representative (AOR) of the applicant organization, and that I have been authorized to submit the attached application on its behalf.
2. I certify that I have examined this application, that all of the information and responses in this application, including certifications, and forms submitted, all of which are part of this grant application, are material representations of fact and true and correct to the best of my knowledge, that the entity(ies) that is requesting grant funding pursuant to this application and any subgrantees and subcontractors will comply with the terms, conditions, purposes, and federal requirements of the grant program; that no kickbacks were paid to anyone; and that a false, fictitious, or fraudulent statements or claims on this application are grounds for denial or termination of a grant award, and/or possible punishment by a fine or imprisonment as provided in 18 U.S.C. §1001 and civil violations of the False Claims Act.
3. I certify that the entity(ies) I represent have and will comply with all applicable federal, state, and local laws, rules, regulations, ordinances, codes, orders and programmatic rules and requirements relating to the project. I acknowledge that failure to do so may result in rejection or deobligation of the grant or loan award. I acknowledge that failure to comply with all federal and program rules could result in civil or criminal prosecution by the appropriate law enforcement authorities.
4. I certify that the entity(ies) I represent has and will comply with all applicable administrative and federal statutory, regulatory, and policy requirements set forth in the Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements ("DOC Pre-Award Notification"), published in the Federal Register on February 11, 2008 (73 FR 7696), as amended; DOC Financial Assistance Standard Terms and Conditions (Mar. 8, 2009); the Department of Commerce American Recovery and Reinvestment Act Award Terms (Apr. 9, 2009); and any Special Award Terms and Conditions that are included by the Grants Officer in the award.
5. I certify that any funds awarded to the entity(ies) I represent as a result of this application will not result in any unjust enrichment of such entity(ies) or duplicate any funds such entity(ies) receive under federal universal service support programs administered by the Universal Service Administrative Corporation (USAC).
6. I certify that the entity(ies) I represent has secured access to pay the 20% of total project cost or has petitioned the Assistant Secretary of NTIA for a waiver of the matching requirement.

Title

Proposed Middle Mile Service Offerings

Name of Service Offering	Distance Band or Point to Point	Minimum Peak Load Network Bandwidth Capacity (Mbps)	Monthly/Yearly Pricing (\$)	Other Comments/Description/Features or Limitations
viNGN only provides wholesale services to retail service providers. It does not provide services directly to either residential, commercial businesses, or institutions. Services to anchor tenants are provided through retail services providers that use viNGN services as a component. There are no special discounts provided, and all price adjustments apply equally to all service providers as per our nondiscrimination policy.				
InternetCONNECT	Point to Point			This is commodity Internet Service - the vast majority of the viNGN network will be used this service.
Internet Access Tunnel	Point to Point			Operates from an anchor tenant location to a hub.
Speed: 10 Mbps	Point to Point	7 Mbps		Basic Internet Access
Speed: 50 Mbps	Point to Point	35 Mbps		Commercial Grade Internet Access
Speed: 100 Mbps	Point to Point	70 Mbps		High Speed Internet Access
Speed: 1 Gbps	Point to Point	700 Mbps		Premium Internet Access
Internet Distribution Tunnel/Internet Transit Tunnel	Point to Point			Operates from a hub location to a gateway location, and tranists from a gateway location to the aggregation point (Miami)
Speed: 1 Gbps	Point to Point	700 Mbps		Basic Distribution Connection
Speed: 10 Gbps	Point to Point	5,000 Mbps		High Speed Distribution Connection -- subject to availability

PrivateCONNECT	Point to Point			This is IP transport with Quality of Service features - although rarely used, some security or latency sensitive situations require private service separate from the commodity Internet as described in the NOFA.
				(Private line connections are essentially providing dedicated bandwidth, and throughput is subject to the customer's own preferences of QoS priority setting between E-line paths in the private tunnel.)
				Low = best effort
				Medium = streaming grade or low latency machine-to-machine transactions
				High = high fidelity interactive voice or synchronized video sessions
				High Plus = Synchronous Ethernet meant for mobile clocking or smart grid SCADA tolerances
Private Access Tunnel				Operates from an anchor tenant location to a hub.
E-line Speed: 10 Mbps; specify:	Point to Point			Basic Internet Access
QoS Priority - Low	Point to Point	10 Mbps		Best effort
QoS Priority - Medium	Point to Point	10 Mbps		Streaming
QoS Priority - High	Point to Point	10 Mbps		Premium voice
QoS Priority - High Plus	Point to Point	10 Mbps		Synchronous Ethernet
E-line Speed: 100 Mbps; specify:	Point to Point			Commercial Grade Internet Access
QoS Priority - Low	Point to Point	100 Mbps		Best effort
QoS Priority - Medium	Point to Point	100 Mbps		Streaming
QoS Priority - High	Point to Point	100 Mbps		Premium voice
QoS Priority - High Plus	Point to Point	100 Mbps		Synchronous Ethernet

Private Distribution Tunnel				Operates from a hub location to a gateway location
E-line Speed: 1 Gbps; spec	Point to Point			Basic Distribution Connection
QoS Priority - Low	Point to Point	1 Gbps		Best effort
QoS Priority - Medium	Point to Point	1 Gbps	\$9,100/\$109,200	Streaming
QoS Priority - High	Point to Point	1 Gbps		Premium voice
QoS Priority - High Plus	Point to Point	1 Gbps		Synchronous Ethernet
Private Transit Tunnel				Operates from a gateway location to the aggregation point (Miami)
E-line Speed: 10 Gbps	Point to Point			Basic Transit Unit (more than one can be purchased) - subject to availability
QoS Priority - Low	Point to Point	10 Gbps		Best effort
QoS Priority - Medium	Point to Point	10 Gbps	\$14,300/\$171600	Streaming
QoS Priority - High	Point to Point	10 Gbps		Premium voice
QoS Priority - High Plus	Point to Point	10 Gbps		Synchronous Ethernet

Service Provider	Service Areas Where Service Available	Technology Platform	Service Tiers	Distance Band or Point-to-Point	Minimum Peak Load Network Bandwidth Capacity	Monthly Pricing	Other Comments/Description/Features or Limitations
AT&T	AT&T has a cable landing in Megan's Bay with a fiber entrance facility to a Point of Presence in Charlotte Amalie	SONET	STM-1	Point-to Point	155MBPS		Approximate price quoted by customer interview. Currently no capacity available for quotation.
Global Crossing	Global Crossing has a cable landing in Hams Bay on St. Croix	SONET	STM-1	Point-to Point	155MBPS		Requires 15 Yr contract with up-front payment for term quoted by customer interview. Currently no capacity available for quotation.

		STM-1		45MBPS	\$6,700.00	Approximate price quoted by customer interview.

VIRGIN ISLANDS
**WATER
AND POWER
AUTHORITY**

OFFICE OF THE
EXECUTIVE DIRECTOR

P.O. BOX 1450,
St. Thomas, Virgin Islands
00804-1450
TELEPHONE: (340) 774-3552

February 15, 2010

VIA EMAIL & FACSIMILE

The Honorable Lawrence E. Strickling
Assistant Secretary for Communication & Information
National Telecommunications & Information Administration
U.S. Department of Commerce
1401 Constitution Ave., N.W.
Washington, DC 20230

Dear Assistant Secretary Strickling:

The Virgin Islands Water and Power Authority ("WAPA") is a semi-autonomous agency of the Territory's government and the sole utility distributing both electrical power and water throughout the archipelago. As Executive Director of this agency and the primary provider of infrastructure for the region, I would like to explain our reasons for supporting the U.S. Virgin Islands' Comprehensive Community Infrastructure (CCI) grant application. We have participated in every aspect of the planning process this year for the USVI project team's broadband plans, and have concluded that it will be very beneficial to our power distribution operations and smart grid transformation here. But more importantly, we have studied the difference it will make to our local communities, and to the USVI as a whole. It is the economic development aspect of this program that is the most important aspect of the entire effort.

While WAPA's power generation facilities and distribution operations are located on both St. Thomas and St. Croix with submarine distribution to St. John, it is part of a regional cooperation with Puerto Rico for the intended mutual distribution of electric power, as well as a planned broadband cooperative effort. The strategic location of the USVI for global broadband interconnection via submarine cables makes it one of the densest broadband connection points in the Western Hemisphere. We need the ability to distribute that communications power throughout the Territory to be able to take advantage of our rare opportunity for economic development, which has been a chronic problem in the Territory for years.

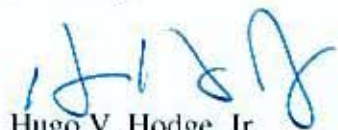

As the only source of underground conduit and the owner of virtually all utility poles in the Territory, we stand ready to support broadband with our extensive supporting infrastructure. This is not only for this middle mile program that would be supported by the CCI grant, but also to assist last mile retail service providers in reaching virtually every home and office that receives electric power. WAPA is ready to provide management expertise, outside plant management and maintenance support of the infrastructure, and wants to use the middle mile to help advance its efforts by using some of the new infrastructure to help deploy its smart grid programs. As you will see from other letters of endorsement from virtually every sector, this will truly be a comprehensive community approach. We are all in this together.

We will be using a joint communications fiber optic system, but we will be segregating the smart grid fiber so that the mission critical latencies needed for controlling the grid can be met. Because of the joint planning of both communications and electrical power distribution, we will be providing a reliability improvement for our electrical power that has been a problem for years. This is because until this plan, the USVI really has not had a true electric grid because of its historical linear deployment. Now, because of the underground ring structure afforded by the deployment of the new middle mile, we will be planning to lay the resilient electrical conduit at the same time. The benefit to the USVI because of this joint planning is incalculable. The efficiencies caused by this collaborative approach have been easy to visualize by all who have participated in the planning.

We are making extensive in kind contributions to this deployment by offering our current network of underground conduit for parts of the core communications and power control network to combat adverse weather situations that are characteristic of the hurricane season in the Caribbean. We are also making all of our utility poles available to the middle mile as well as the easements that are needed for the extensive set of hub locations that will go in around the Territory that will support all of the last mile service providers. As I said, we are all in this together.

We look forward to the day that the USVI broadband plan, with your help, will start helping WAPA and the rest of our local economy.

Sincerely,

A handwritten signature in blue ink, appearing to read 'H. Hodge', is written over the printed name.

Hugo V. Hodge, Jr.
Executive Director (CEO)

Julito Francis
Executive Director
Virgin Islands Office of Economic Opportunity
32&33 Kongens Gade, Government Hill
St. Thomas, US Virgin Islands 00802

Dear Executive Director Francis:

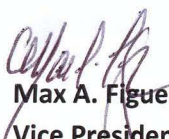

We have been informed by your organization, that the Office of Economic Opportunity, of the US Virgin Islands is applying to receive BTOP funds for the developing of Virgin Island New Generation Network. Our company's expertise resides in the development, implementation and operation of sophisticated Internet Infrastructures which are the cornerstone of New Generation Networks.

In case the BTOP funds are assigned to your organization, we would be interested in exploring our participation, in the area of Collocation and Global Internet Access providers.

Our interest is of course contingent on the award of the BTOP funds to the Office of Economic Opportunity, as well as a mutually satisfactory executed Contract and Statement of Work consistent with the scope of effort negotiated by the OEO with the NTIA, and the receipt of the associated purchase orders acceptable to us, pursuant to that final Contract and Statement Of Work.

We have thoroughly enjoyed learning about, and providing inputs to the process of conceptualizing the Comprehensive Community Infrastructure that you are preparing along with the other business partners, and we look forward to a long and lasting relationship in this endeavor.

Sincerely,

Max A. Figueroa
Vice President – International
Terremark Worldwide, Inc.

Dear Executive Director Francis:

This is our company's letter of commitment that we are in readiness to support *viNGN*, the U.S. Virgin Islands Next Generation Network, in our assigned area of responsibility.

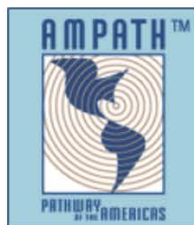

Our role in the project that we are speaking of will be that of provider of public network transit and interconnection to the commodity Internet, Internet2, and the National Lambda Rail public sector networks.

Our plan is of course contingent on the award of the BTOP funds to the Office of Economic Opportunity, a mutually executed Statement of Work consistent with the scope of effort negotiated by the OEO with the NTIA, and the receipt of the associated purchase orders pursuant to that final SOW. We have thoroughly enjoyed helping in the process of preparation of the Comprehensive Community Infrastructure that you are preparing along with the other business partners, and we look forward to a long and lasting relationship in this endeavor.

Sincerely,

A handwritten signature in blue ink, appearing to read 'D.A. Chip Cox', is written over a light blue background.

Re: Letter of Commitment to Support *viNGN*'s Last Mile Project

Dear Executive Director Francis:

This is our company's letter of commitment that we are in readiness to support U.S. Virgin Islands Next Generation Network d/b/a *viNGN*, in our assigned area of responsibility which we shall describe herein.

Our role in the *viNGN*'s project will be that of a provider of middle mile lambda and optical transmission services from the U.S. Virgin Islands to Isla Verde, Puerto Rico. Such role is, of course, contingent on the award of the Broadband Technology Opportunities Program (BTOP) funds to the Office of Economic Opportunity (hereinafter OEO), a mutually executed Statement of Work (hereinafter SOW) consistent with the scope of effort negotiated by the OEO with the National Telecommunications Information Administration (NTIA), and the receipt of the associated purchase orders pursuant to that final SOW.

We have a genuine interest in the project presented by *viNGN*, for we see potential of furthering telecommunication services in several areas in the U.S. Virgin Islands. Accordingly, we have been pleased to assist in the preparation process of the Comprehensive Community Infrastructure that *viNGN* is currently working on, and we look forward to a long and lasting relationship in this endeavor.

Sincerely,

José D. Casillas
General Manager

Dear Executive Director Francis:

This is our company's letter of commitment that we are in readiness to support *viNGN*, the U.S. Virgin Islands Next Generation Network, in our assigned area of responsibility.

Our role in the project that we are speaking of will be that of a service provider; specifically providing Ethernet exchange services pursuant to our standard terms and conditions and interconnected at one of our established locations.

Our plan is of course contingent on the award of the BTOP funds to the Office of Economic Opportunity, a mutually executed Statement of Work consistent with the scope of effort negotiated by the OEO with the NTIA, and the receipt of the associated purchase orders pursuant to that final SOW.

We have thoroughly enjoyed helping in the process of preparation of the Comprehensive Community Infrastructure that you are preparing along with the other business partners, and we look forward to a long and lasting relationship in this endeavor.

Sincerely,

Re: Letter of Commitment to Support the USVI Middle Mile Project

Dear Executive Director Francis:

Please accept this letter as Stratum Broadband's confirmation of readiness and commitment to support the U.S. Virgin Islands in the development of a Next Generation Network.

Stratum Broadband will provide project and design management for the planned broadband network from its inception. We understand that our role in this project is contingent upon receipt by the Virgin Islands Office of Economic Opportunity (OEO) of a grant award from the Broadband Technology Opportunities Program. Upon notice of award, Stratum agrees to work with the OEO to negotiate a mutually agreeable Statement of Work consistent with the scope of effort and within the terms of the Program as prescribed by the National Telecommunications Information Administration.

We have been pleased to assist the OEO in planning for its Next Generation Network, and we look forward to working with you in building your *Comprehensive Community Infrastructure*.

Sincerely,

John A. Foresto
Managing Partner

Re: Letter of Commitment to Support the USVI Middle Mile Project

Dear Executive Director Francis:

Please accept this letter as Integrated Architectures' confirmation of readiness and commitment to support the U.S. Virgin Islands in the development of a Next Generation Network.

Integrated Architectures is a Stratum Broadband business partner. We will provide services to assist in mapping and systems integration for OSS and billing systems. We understand that our role in this project is contingent upon receipt by the Virgin Islands Office of Economic Opportunity (OEO) of a grant award from the Broadband Technology Opportunities Program. Upon notice of award, Integrated Architectures agrees to work with the OEO to negotiate a mutually agreeable Statement of Work consistent with the scope of effort and within the terms of the Program as prescribed by the National Telecommunications Information Administration.

We have been pleased to assist the OEO in planning for its Next Generation Network, and we look forward to working with you in building your *Comprehensive Community Infrastructure*.

Sincerely,

John Reynolds,
President

Virgin Islands Office of Economic Opportunity
32&33 Kongens Gade, Government Hill
St. Thomas, US Virgin Islands 00802

Dear Executive Director Francis:

This is our company's letter of commitment that we are in readiness to support *viNGN*, the U.S. Virgin Islands Next Generation Network, in our assigned area of responsibility.

As one of the world's most comprehensive providers of security systems, we first want to commend you on the breadth with which you are planning the U.S. Virgin Islands communications landscape. Rarely outside of the Department of Defense do we see such adequacy for the matters of security in statewide planning. Of course all statewide plans have to be tailored to the size and scope of the particular environment, but we commend you on your approach.

Specifically, we see that your middle mile fiber optic communications system will grow to be the heart of many of your different constituent needs, both within the anchor tenants of your public sector organizations as well as your various carrier providers and commercial companies' networks.

Your fundamental communications system will be straightforward to support from a security standpoint. But it is your comprehensive community approach to security that seems so impressive. In particular, your accommodation for companion security support for smart grid security is to be commended. Most states are struggling with the implications of protecting their power infrastructure, the home interface, and the commercial management of their distributed control systems. But your judicious use of compatible components and systems is very sound.

Similarly, your precautions with regards to personal privacy in the management of electronic health records seem most appropriate.

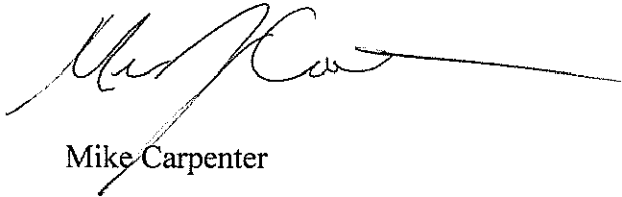

Lastly, and we speak with some degree of authority on this point, your plans for operating all elements of public safety in a secure manner from your new consolidated command center are to be especially commended. Although coming from seemingly diverse system environments, your situational awareness from all quarters seems exceptional when compared to other statewide efforts.

We at McAfee are proud of our opportunity to be of service in orchestrating as many of these different areas as you would like for us to using our portfolio of security elements. While we are ready to commence deployment of the security aspects of your *viNGN* middle mile, we also stand ready to deploy the compatible building blocks for these other diverse needs at your direction. Thank you for giving us this opportunity to demonstrate what we can do for your comprehensive community approach to planning.

Our plan is of course contingent on the award of the BTOP funds to the Office of Economic Opportunity, a mutually executed Statement of Work consistent with the scope of effort negotiated by the OEO with the NTIA, and the receipt of the associated purchase orders pursuant to that final SOW.

We have thoroughly enjoyed helping in the process of preparation of the Comprehensive Community Infrastructure that you are preparing along with the other business partners, and we look forward to a long and lasting relationship in this endeavor.

Sincerely,

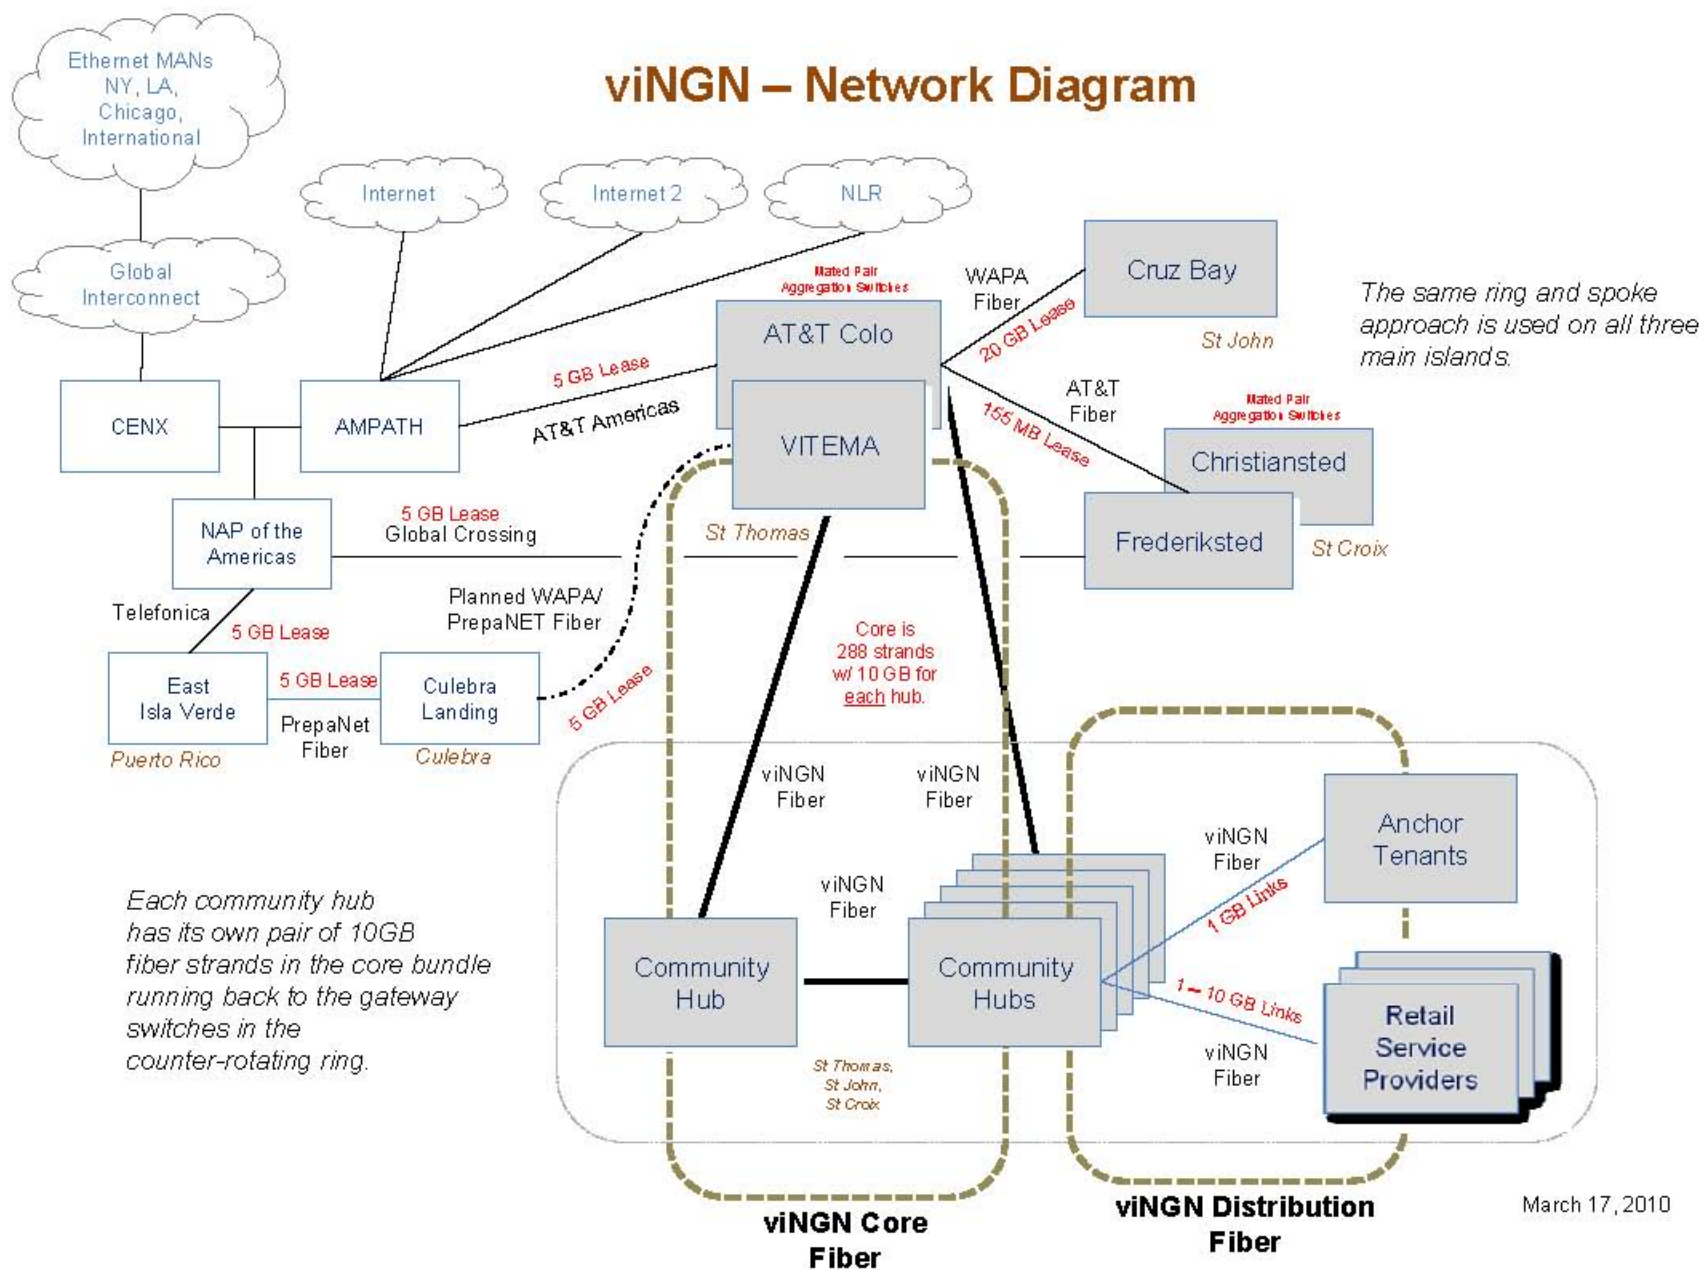

A handwritten signature in black ink, appearing to read "Mike Carpenter", with a long horizontal flourish extending to the right.

Mike Carpenter

Senior Vice President Public Sector

McAfee

viNGN – Network Diagram

BTOP Comprehensive Community Infrastructure Community Anchor Institution and Network Points of Interest Detail Template

Please complete the Anchor Institution Details worksheet by providing information on all Community Anchor Institutions that will be directly connected by the proposed network as necessary. All Community Anchor Institutions should be given a type from the specification. A Community Anchor Institution is considered a minority-serving institution if it is a post-secondary educational institution with enrollment of minority students exceeding 50% of its total enrollment. The "Project Role" column only requires a word or two, or a short phrase, not a detailed explanation of the role of project partners and community anchor institution provided in the essay portions of the application.

Please complete the Points of Interest worksheet by providing information on all points of interest. Points of interest include, but are not limited to, interconnection (passive, non-environmentally controlled points of interconnection, e.g., fiber optic points, may be excluded), collocation facilities, central offices, head ends, and other central facilities, network access points to last mile service providers, Internet peering points, etc. For each point of interest you may provide either a street address or geocoordinates (latitude/longitude). You must provide detail on what the point of interest is, whether it is already existing or will be created by the proposed project. Where more than one facility type applies, select the most appropriate facility type. For example, if a central office houses a point of interconnection, select central office as the facility type, or if a cell site is located on a tower, select tower as the facility type. The "Interconnection Available at the Facility" field should be Yes if interconnection to the proposed network is available at that location, otherwise No. The brief description field is optional and may be used to convey a better understanding of what the facility is. You may use the space at the bottom of the table to provide additional notes, if desired.

The data provided via this template will be subject to automated processing. Applicants are therefore required to provide this upload as an Excel file, and not to convert it to a PDF or other format for upload. Additionally, applicants should not modify the format of this file.
