## Report Description:

This report highlights the differences in broadband availability in rural vs. urban areas. The metrics used to illustrate these differences include speed, technology and provider availability.
"Rural" and "Urban" definitions: Census bureau (2000).
Data as of December 2010, Report published September 2011

## Speed Availability

This section illustrates the differences in download, upload, and combination download/ upload speed availability in rural vs. urban areas.

## Map

The map illustrates the difference in speed availability, in terms of percent of population, for the download $>3$ mbps, upload $>768 \mathrm{kbps}$ speed tier. This is calculated by subtracting the percent of the population with access to this speed in rural areas from the percent of the population with access to this speed in urban areas.

Urban vs. Rural- Difference in Speed Availability ( $\mathrm{DL}>3 \mathrm{mbps}$, UL $>768 \mathrm{kbps}$ )

Speed Availability ( $\mathbf{3} \mathbf{~ m b p s ~ D L , ~} 768$ Kbps UL) by State - Rural vs. Urban Areas

NBM
National Broadband Map

## Download Speed Availability

This graph displays the percent of rural and urban populations with reported availability for various download speed tiers.

Download, Upload Speed Availability
This graph displays the percent of rural and urban populations with reported availability for download, upload speed combinations.

## Broadband Statistics Report

Broadband Availability in Urban vs. Rural Areas

## Upload Speed Availability

This graph displays the percent of rural and urban populations with reported availability of various upload speed tiers.

## Difference in Speed Availability

This graph compares differences in reported DL speeds, UL speeds and combinations of DL and UL speeds in rural vs. urban areas.

Broadband Statistics Report
Broadband Availability in Urban vs. Rural Areas

Technology Availability
This section illustrates the differences in any (wireline or wireless) technology availability in rural vs. urban areas.

## Chart

This chart displays the percent of urban and rural populations within each state with access to any technology (wireline or wireless).

## Map

The map illustrates the difference in technology availability, in terms of percent of population, for any (wireline or wireless) technology. This is calculated by subtracting the percent of the population with access to any technology in rural areas from the percent of the population with access to any technology in urban areas.

Urban vs. Rural - Difference in Technology Availability (Wireline or Wireless)

Technology Availability (Any Technology) by State - Rural vs. Urban Areas
$\square$ Urban $\square$ Rural

National Broadband Map

## Broadband Statistics Report

Broadband Availability in Urban vs. Rural Areas

## Technology Availability

The chart to the right displays the percent of population in rural vs. urban areas with reported access to various broadband technology types. Wireline technologies (DSL, Copper, Cable, Optical/Fiber) are shown in the center, while Wireless technologies (Terrestrial Fixed and Terrestrial Mobile) are displayed on the right.

Difference in Technology Availability
The graph to the right compares the percent difference of reported technology types in rural vs. urban areas. This is calculated by subtracting the percent of the population with access to a given technology in rural areas from the percent of the population with access to that technology in urban areas.

## Broadband Statistics Report

Broadband Availability in Urban vs. Rural Areas

## Provider Availability

This section illustrates the differences in provider availability (in terms of access to a given number of providers) in rural vs. urban areas

## Map

The map illustrates the difference in provider availability, in terms of percent of population, of three or more providers (wireline or wireless). This is calculated by subtracting the percent of the population with access to three or more providers in rural areas from the percent of the population with access to three or more providers in urban areas.

Provider Availability ( $\geq 3$ Total Providers - Wireline or Wireless) by State - Rural vs. Urban Areas
$\square$ Urban $\square$ Rural

## Chart

This chart displays the percent of urban and rural populations within each state with access to three or more providers (wireline or wireless).

## Broadband Statistics Report

Broadband Availability in Urban vs. Rural Areas

## Wireline Provider Availability

This graph displays the percent of rural and urban populations with access to a given number of wireline providers. Wireline technologies include DSL, Copper, Cable Modem, Optical/ Fiber, and Electric Power Line.

## Wireless Provider Availability

This graph displays the percent of rural and urban populations with access to a given number of wireless providers. Wireless technologies include Terrestrial Fixed Wireless and Terrestrial Mobile Wireless

Provider Availability
The chart to the right displays the difference in the reported number of providers in rural and urban areas.

Difference in Provider Availability - Rural vs. Urban Areas
