Network usage will not be limited to anything less than the purchased bandwidth; users on Enventis' network will have a choice of service levels. By default, Layer 1 TDM service is a guaranteed bandwidth service; Layer 2 and 3 services will be offered with a choice of five classes of service and user defined bandwidth profiles. Enventis will employ generally acceptable network management practices and its interconnection policies will be displayed on its web site. Enventis has learned that it is very important to document everything and keep a central repository. We have started a Grants File to track all required documents and reporting along with anything that is project related. We continually update and organize that folder to make it easy to find required information.
