

BTOP Comprehensive Community Infrastructure Service Area Template

Please complete the complete the CCI Service Area worksheet. In each line you will provide name of a service area and one of the contiguous Census tracts or block groups that make up service area. Please provide full 11-digit Census tract numbers, includes the 2-digit State FIP the 3-digit county code, followed by a unique 6-digit tract number. For Census block groups please provide the full tract number, plus the 1-digit block group number (12 digits total). If more than one Census tract or block group in a service area, there will be multiple lines in the for that service area. It is critical that the service area names provided in this table match with service area names provided in the Service Area Details page of the application. Please review document and Service Area Details page for consistency before submitting your application.

Important Note: Excel truncates leading zeros from numbers. Consequently, the tract/block column on the worksheet has been formatted as text. This formatting should not be altered validity of your data may be compromised.

The data provided via this attachment will be subject to automated processing. Applicants are therefore required to provide this attachment as an Excel file, and not to convert it to a PDF submitting a copy of your application on an appropriate electronic medium, such as a DVD, CD-ROM, or flash drive. Additionally, Applicants should not modify the format of this file (*e.g.*, by adding or removing worksheets). Do not leave blank lines in the table between service area

EXAMPLE

Director of Operations	Motorola, Inc. 6450 Sequence Drive San Diego, CA 92121
Year of Hire:	1989
Motorola Professional Experience:	2009-Present: Director of Operations. Lead team responsible for both delivery and service aspects of all project deployments to public safety and enterprise customers in Western U.S. 2004-2009: Regional Program Mgmt Director. Led team responsible for contract delivery and network commissioning efforts related to the public safety core radio portfolio. 2001-2004: Integrated Solutions Division – Delivery Manager. Led team responsible for contract delivery and commissioning of back office public safety systems like CAD, RMS, Jail Mgmt, and Mobile Applications portfolio. 1999-2001: Program Mgmt Resource Mgr - SoCal. Led team responsible for deployment of public safety radio solutions in Southern California 1996-1999: System Eng Mgr – SoCal. Led team of systems engineers responsible for end to end design integrity of all proposed and contracted public safety radio networks. 1994-1996: System Eng/Network Architecture Mgr – Led team to design and deploy large scale wireless packet data networks for international Telco's such as Telecom Australia, Singapore Telecom, Hutchison Mobile Data Ltd. 1989-1994: Systems Eng & Design/Test Eng – engineered products and systems for public safety and large telecom wireless entities. Held various engineering positions on multiple product lines.
Other Professional Experience:	1984-1989 Sperry/Unisys – Design & Test Engineer – held various engineering positions relating to the design and test of electronic avionics systems for the defense space – both Navy and Air Force applications.
Education	BSEE, University of Manitoba, Winnipeg, Manitoba Canada Diploma Mgmt Skills in Advanced Technologies, Simon Fraser University, Burnaby, British Columbia Canada
Training, Certifications, and Memberships	Professional Engineer, Association of Professional Engineers and Geoscientists of the Province of British Columbia

Philip W. Raymond

Engineering Manager

Motorola Inc
6450 Sequence Drive,
San Diego, CA 92121 U.S.A.
(858) 404-4332

Date of Hire:

August 1989

Motorola Professional Experience:

My Motorola experience includes the full spectrum of communication system design from needs and requirements through, system design alternatives, system proposal, detail design, staging and implementation. My expertise is in the design, implementation and engineering management of voice and data radio networks particularly simulcast, Project 25 and transit.

12/04 - Present

Engineering Manager, West Coast

Responsible for forty engineers and the design and implementation of voice and data networks, in seven states. Systems include conventional radio systems, dispatch consoles, data systems, transit management systems, video systems, backhaul networks and statewide trunked radio networks.

12/01 to 12/04

Program Engineering Manager, Los Angeles

Led engineering team for the implementation and software development, of a 2400 bus transit system for Los Angeles County Metropolitan Transit with value of \$98M. This system design met and passed all system requirements in 2004. The system is operational and includes CAD, AVL, RSA, Video, WLAN, simulcast voice and data systems and bus vehicles.

12/98 to 12/01

Engineering Manager, Midwest

Responsible for eleven engineers and the design and implementation of two-way radio systems, in WI, MN, IA, MO, KS, NE, ND and SD. Led engineering team for the 39-site MN Metro system. System operational 11/2001 with contract value of \$65M.

9/96 to 12/98

Engineering Group Leader, Minneapolis, MN

Led four engineers in the engineering design and writing of a competitive technical proposal for the MN Metro 9-county radio system. This system used new technology and software for almost all equipment in this \$65 Million system. Also led successful technical negotiations with customer.

	8/89 to 8/96 System Architect/Staff Engineer/Group Leader, Schaumburg, IL Provided engineering direction for multi-site 2-way radio projects: Minnesota Metro Project, MN – 39 site simulcast London Metropolitan Police, UK - 80-site simulcast Michigan State Police, MI - 160-site ASTRO 25 Northern States Power, MN - Six-site simulcast
Other Professional Experience:	Proposed and implemented consulting projects for public safety agencies across the United States. Major projects included studies for the State of Michigan and procurement for the City of Houston. <i>SFA Public Safety Consultants, Lake Bluff, IL 1987 - 1989</i> Senior Engineer Proposed and implemented consulting projects for public safety agencies. Major projects included design studies for the State of Michigan, system procurement for the City of Houston. Other projects included dispatch, microwave, RF and coverage design and testing for various agencies in Illinois, Ohio, MI and NJ.
Education	BACHELOR OF ELECTRONIC ENGINEERING Brighton Polytechnic, United Kingdom
Training, Certifications, and Memberships	Wrote White Papers on Traceability Process (2003) and High Capacity Transit Data System (2006).

Randall L. Rosetta

randy.rosetta@motorola.com

EMPLOYMENT

May 2009 to Present: **Director of SI, Western Division, Complex Projects Team**-Motorola Inc. San Diego, CA

Responsible for managing program management, engineering and deployment teams supporting the deployment of complex projects and new technologies in the Western Division territory.

Oct 2006 to May 2009: **NA Director of Central Deployment-Sprint-Nextel & Clearwire**-Motorola Inc. Arlington Heights, IL

Responsible for managing program management, engineering and deployment teams supporting the deployment of iDEN, CDMA and WiMAX technologies for Sprint-Nextel and Clearwire.

Dec 2004 to Oct 2006: **Core Networks Director of NPI and Product Support**-Motorola Inc. Tewksbury, MA

Responsible for managing program managers, engineers, and deployment teams supporting the introduction and testing of all new CND technologies/products globally. Also managing global Product Support organization for all CND products.

May 2004 to Dec 2004: **GTSS EMEA Director of Infrastructure and Support**-Motorola Inc. Johannesburg, South Africa

Responsible for managing program management, support engineering, training and implementation teams supporting the deployment of all GTSS technologies, in Europe, Middle East and Africa.

July 2003 to May 2004: **GTSS Regional Operations Director**-Motorola Inc.
Johannesburg, South Africa

Responsible for managing program management, engineering, operations, commercial, training and implementation focused teams supporting the deployment of all GTSS technologies, including GSM & CDMA systems, in Central and Southern Africa. Territory encompasses all African countries below Sub-Saharan Africa.

Jan 2002 to July 2003: **GTSS Regional Operations Director**-Motorola Inc.
Taunusstein, Germany

Responsible for managing program management, engineering, operations, commercial, training and implementation focused teams supporting the deployment of all GTSS technologies, including GSM & CDMA systems, in Central and Eastern Europe. Territory encompasses Germany, Austria, Hungary, Czech Republic, Poland, and Russia

Oct 1999 to Jan 2002: **Operations Director**-Motorola Inc.-Istanbul, Turkey

Responsible for managing engineering, operations, commercial, training and implementation focused program management teams supporting the nationwide deployment of a GSM system for Telsim. Teams were responsible for all aspects of implementing 250+ sites per month. System size was 4,000 sites and 5 million subscribers. Included managing customer satisfaction, quality and system performance, FNE and ancillary equipment sales/purchase, logistics and import process, and contract compliance.

May 1997 to Oct 1999 **Area Operations Manager**-Motorola Inc.-Denver, CO

Responsible for managing engineering, operations and implementation focused program management teams supporting Nextel markets in: Denver, CO; Salt Lake City, UT; Oakland, CA; Santa Clara, CA; Sacramento, CA. Teams are responsible for all aspects of implementing 650+ site, 5 switch iDEN ESMR systems currently supporting in excess of 450,000 subscribers.

April 1995 to May 1997: **Operations Manager**-Motorola Inc.-Birmingham, AL

Responsible for managing all aspects of implementing a \$150M, 300+ site, iDEN ESMR system. Includes managing customer Satisfaction, FNE sales, contract compliance, project budget, subcontracts, implementation schedules, post acceptance system warranty/maintenance, and overall project profitability. Project completed on schedule and under budget.

Jan 1994 to April 1995 **Sr. PM/Asst. System Mgr.**-Motorola Inc.-Denver, CO

Responsible for managing the overall business of implementing a 50+ site iDEN ESMR system, and post acceptance warranty and maintenance. Includes managing SI revenue, costs, subcontracts, project profitability, and implementation schedules. Includes interviewing and hiring project team personnel. 10 direct report team members consisting of engineers, PM Field supervisors, service team, technicians, and administrative personnel. Project completed on schedule and under budget.

Oct. 1990 to Jan 1994 **Sr. PM/SI Team Leader**-Motorola Inc.-Denver, CO

Responsible for managing overall business of assigned projects as well as post acceptance warranty and maintenance. Responsible for supervision and training of Denver SI team personnel.

Jan 1987 to Oct. 1990 **Sr. Program Manager**-Motorola Inc.-Denver, CO

Responsible for managing overall business of assigned large projects (>3M) as well as post acceptance warranty and maintenance.

Nov. 1985 to Jan 1987 **Program Manager**-Motorola Inc.-Denver, CO

Responsible for managing overall business of assigned projects (<3M) as well as post acceptance warranty and maintenance.

- Mar 1983 to Nov. 1985 **Project Supervisor**-Motorola Inc.-Grand Jct., CO
- Report to PM and assist with managing overall business of assigned projects as well as post acceptance warranty and maintenance.
- Sept. 1977 to Mar 1983 **Customer Service Manager**-Motorola Inc.-Denver, CO
- Responsible for supervising assigned service shops within a four-state territory. Including financial management, receivable collections, maintenance contract sales, and resolving customer complaints.
- Aug. 1976 to Sept. 1977 **Supervisor**-LEC Construction-Denver, CO
- Responsible for project planning, scheduling, and material control on large commercial construction projects.
- Feb. 1974 to Aug. 1976 **Foreman**-Mead Mount Construction-Denver, CO
- Responsible for planning, coordinating, and supervising the activity of 300-man heavy construction crew.
- Nov. 1972 to Feb. 1974 **Technical Representative**-Ford Motor CO-Denver, CO
- Responsible for providing technical supervision, training, and specific trouble shooting skills for dealership service departments within assigned territory.
- Jan 1972 to Nov. 1972 **Quality Control Technician**-CSR Company-Palatine, IL
- Responsible for quality control and defect tracking/resolution for commercial manufacturer of automotive electronics components.

EXPERIENCE

Projects completed

May 1997 to Oct 1999

Nextel Project-Western US

Denver, CO. 650+ site iDEN ESMR systems in Denver, Salt Lake City, Oakland, Santa Clara, and Sacramento including NTI DMS switches, EBTS cell sites, and tower/building/generator site development. This included providing pre-planning support to U.S. Olympic Committee for 2002 games in Salt Lake City.

Jan 1992 to May 1997

R56 National Installation Standards Committee

Appointed to committee to assist with development and refinement of the corporate nationwide FNE installation standards manual. Contributing editor.

April 1995 to May 1997

Southern Company Project

Birmingham, AL. 300+ site iDEN ESMR system including NTI DMS switch, EBTS cell sites, and tower/building/generator site development. *This included providing communications support for ACOG at the 1996 Olympic Games in Atlanta.*

Jan 1994 to April 1995

OneComm Project

Denver, CO. 75 site iDEN ESMR system including NTI DMS switch, EBTS cell sites, and ongoing system maintenance.

Dec. 1993 to May 1994

United Airlines-Denver International Airport

Denver, CO. Multi site SMR with fiber optic interface, 80 position CC2+ console and Embassy switch. Spectra, MaxTrac, MTS2000 subscriber units.

Oct. 1993 to Dec. 1993

San Juan County Wide Area Simulcast Project

Aztec, NM. County wide Police/Fire/EMS repeater system and E911 center. Installation of RF FNE, 6ghz MW, towers, buildings, generators.

Dec. 1992 to Dec. 1993

City of El Paso Simulcast SMARTNET System

El Paso, TX. County wide Police/Fire/EMS simulcast trunked system and E911 center. MSF, SIMS, MTS, Saber, Mobile Data, CentraComm II, SRX E911, towers, buildings, generators.

March 1992 to Dec. 1992

Ellis County SMARTNET System

Hays, KS. County wide Police/Fire/EMS trunked system and E911 center. MSF, SIMS, MTS, Saber, CentraComm II, towers, buildings.

- Feb. 1991 to March 1992 **Motorola CoveragePLUS Project**
Team leader for 10 state areas, Denver based. Nationwide Voice/AVL/SMR system.
- Sept. 1990 to Feb. 1991 **U.S. Air Force Space Technology H.Q. Project**
Kirtland Air Force Base, Albuquerque, NM. Underground nuclear weapons storage facility Secure Voice system. MSF, Digitac, DVP, Saber, Radiax.
- March 1990 to Sept. 1990 **U.S. Department of Defense**
Seattle, WA. 1990 Goodwill Games multi site secure voice system. FNE, CentraComm, Saber.
- Sept. 1989 to March 1990 **Motorola Network Services**
8 state area, Denver based. SMR service coordination and site construction implementation.
- May 1989 to Sept. 1989 **Boeing Aircraft Company**
Seattle, WA. Wide area AMSS system. Secure voice, multi site, FNE and portables.
- Feb. 1989 to May 1989 **IBM Corporation**
3 state area, Denver based. Rocky Mtn region of the nationwide Digital Communications system. FNE and data portables.
- Nov. 1988 to Feb. 1989 **City of Las Cruces**
Las Cruces, NM. Police mobile data system and MW interconnect. KDT480 FNE and portables.
- March 1987 to Nov. 1988 **Federal Bureau of Investigation-Keppner Project**
COLO-WYO, Denver based. 50 site wide area secure voice system. Consoles, MW, RF links, towers, buildings, generators, MSF, and Saber.
- Jan 1987 to March 1987 **Hill Air Force Base-Commanders NET**
Ogden, UT. Secure voice system. FNE, consoles, portables.
- Sept. 1986 to Jan 1987 **Northwest Pipeline Corporation**
WY to WA, Rock Springs, WY based. 70 site MW system. FNE, site development.
- Oct. 1985 to Sept. 1986 **City of Santa Fe Police Department**
Santa Fe, NM. Trunked SMARTNET system, CAD, FNE, mobiles, portables.

Jan 1985 to Oct. 1985	City of Albuquerque Water Department Albuquerque, NM. 72 site Multi address control system, 900 MHz SCADA, FNE, and RTU's.
June 1984 to Jan 1985	CENTEL Cellular Company Omaha, NE and Las Vegas, NV. Multi site AMPS cellular system. EMX250, 500 MSC's, cell site FNE, site development.
March 1983 to June 1984	Deseret Generation and Transmission WY, UT, & CO. Vernal, UT based. 34 site MW/UHF wide area system. Site development, tower construction, buildings, generators, civil work.

List does not include numerous smaller projects of 4 months duration or less.

EDUCATION

October 2001	PMI Certified PMP (Project Management Professional)
August 2001	George Washington University-Masters-Program Mgmt.
June 1996	Motorola-Leading Edge Institute
September 1995	Motorola-Manager of Managers Institute
May 1994	Motorola iDEN System School
December 1993	Motorola Systems Integration Institute
May 1988	Motorola-Federal Gov't Procurement and Ethics practices
September 1981	Motorola-Manager of Managers Development Course
December 1979	Motorola-Executive Development Course
June 1976	Red Rocks College-Business Administration
January 1974	Denver Tech College-Automotive Technology
January 1972	Palatine High School

REFERENCES

OTHER

1993 to 2000

Chairman, Board of Directors-Larkspur Fire District

Responsible for developing policy and managing all business/legal issues for the Larkspur Fire Protection District. Providing interface to County Commissioners, Colorado State Patrol, Colorado Dept. of Health, and State of Colorado. 12 full time employees and 44 part time and volunteer employees. 3 stations and 16 major apparatus. District has an annual operating budget of 850K. Part time.

1987 to 2000

Patrol Deputy-Douglas County Sheriff's Department

State of Colorado Certified Level 1 Police Officer. Certifications for Patrol, Traffic Enforcement, DUI Interdiction. Certified Instructor for FBI Defensive Tactics and Laser/Radar speed detection devices. Part time.

1990 to 2000

EMT-B (AED)-Larkspur Fire District

State of Colorado Certified BLS/Firefighter/Rescue Technician. Squad commander for Heavy Rescue 4, extrication and special rescue IC. Volunteer.

HOBBIES

Boating, Scuba diving and motorcycling

Phil Schuhler

Engineering Manager

Motorola Inc.
6450 Sequence Drv.
San Diego, CA, 92126
858-404-4431

Year of Hire:

1994

Motorola Professional Experience:

Qualification Highlights

- Over 20 years experience in system engineering of complex wireless solutions
- BSEE/MSEE in Communication Systems/Sciences
- Demonstrated initiative, creativity, and professional advancement
- Proactive hands-on manager focused on team collaboration
- Experience managing geographically distributed teams
- Work in rapidly changing business environment applying latest technologies
- Goal oriented leader with special attention to detail
- Excellent verbal and written communication skills

2000 - Present

Engineering Manager, National Data Solutions Engineering

Manage highly skilled team of system engineers responsible for presale requirements gathering, conceptual design, functional/detailed design, system implementation, testing, and final system acceptance. Team chartered to learn, master, and teach emerging wireless technologies to others.

- *Long Term Evolution (LTE)* – 3GPP standards based private LTE solution for Public Safety, 700 MHz BC14 spectrum utilization.
- *Wireless Broadband Solutions* - Wireless meshing technology, 802.11a/b/g standards based, 2.4 GHz and 4.9 GHz spectrum utilization, efficient high-speed mobility, dynamic network configuration, megabit data rates.
- *Mobile Data Application Integration* – Computer Aided Dispatch, Messaging, Status, Database Query, AVL using GPS.
- *Mobile Data Communication Systems* – Proprietary narrowband air interface protocol, signal acquisition, data interleaving, forward error correction, kilobit data rates.

1994 - 2000

Lead System Engineer, Emerging Technology Department

Responsible for system architecture, system conceptual design, RF coverage modeling, frequency channel planning, throughput and capacity analysis, and deployment for narrowband wireless data systems. Project phases included: requirements gathering, requirements analysis, proposal generation, customer technical presentation, contract negotiations, system deployment, and achieving final system acceptance.

- *Los Angeles Police Department* – Team leader for \$20M extremely high capacity, highly available (5 Nines) wireless data system serving over 1200 public safety officers. Included custom software application development for officer dispatching.
- *San Diego County Sheriff* – Lead engineer for \$6M countywide high capacity wireless data system serving multiple city/county agencies.
- *San Diego Gas & Electric* – Lead engineer for \$1.5M countywide wireless data system providing automated dispatching and vehicle location.

Other Professional Experience:

1991 - 1994

Senior Member Technical Staff

TRW Avionics and Surveillance Group

Responsible for the design and development of various software algorithms and models for digital data/voice communication systems.

- *Signal Processing Implementation* - Designed processing software for a spread spectrum digital data/voice communication system. The TMS320 C40 transmit and receive system employed convolutional encoding/decoding, data encryption/decryption, block interleaving/de-interleaving, and FSK modulation/demodulation.
- *Data Stream Synchronization* - Developed software phase-lock loop bit synchronization algorithm for digital data/voice systems. Evaluated BER and acquisition performance via simulation using custom input signal generation and noisy channel modeling.
- *Spectral Containment* - Developed model to determine optimal filtering required for specified co-channel interference of frequency modulated data and digital voice transmission. Verified simulation results with laboratory experiment.
- *Multi-Stage Correlation* - Simulated hardware implementation of four-stage correlator for digital data/voice communication processing. Determined characteristics of architecture and identified decision algorithm required for peak detection.

1989 - 1991

Member Technical Staff II

TRW Avionics and Surveillance Group

Provided system engineering support in the areas of testing and system integration for multi-receiver/multi-processor systems.

- *Integrated Avionics Systems* - Conducted acceptance testing and integration of receiver subsystem, phase interferometry processing and pulse parameterization. Supported RF built-in-test demonstration using TMS370 processor, spur and phase noise analysis, and automated SNR algorithm.

1987 - 1989

Member Technical Staff I

TRW Electronic Systems Group

Provided system engineering support in the areas of software testing, tool development, and hardware design evaluation.

- *Payload Processor Subsystem (MILSTAR)* - Verified performance of payload management software prior to integration and test. Developed software tool for automated comparison of initial payload connectivity to known database. Evaluated digital hardware design and documentation for a TI9000 processor unit and recommended problem solutions to Design Review Board.

1983 - 1987

**Co-op Engineer, Passive Electronic Warfare Department
Magnavox Government and Industrial Electronics**

Provided engineering support in the areas of test environment development, testing, and equipment calibration.

- *Test Systems* - Designed, constructed, and tested custom test fixtures for digital receiver control and statistical measurement of fiber optic driver/detector connections.
- *Unit Calibration* - Designed and implemented automated calibration procedure for voltage controlled oscillator using an HP9836 computer/HPIB controlled equipment.

Education

MSEE

Emphasis: Communication Theory and Digital Signal Processing
University of Southern California (USC) - Los Angeles, CA

BSEE

Purdue University - W. Lafayette, IN

**Training, Certifications,
and Memberships**

- *Currently hold CompTIA Network+ Certification*
- *Previously held Top Secret (TS) and Extended Background Investigation (EBI) Security Clearances*

Zia Siddiqui

Solutions Architect

Motorola Inc.
6450 Sequence Drv.
San Diego, CA, 92126
858-404-4368

Year of Hire:

1998

Motorola Professional Experience:

1998 to Present.

Solutions Architect – Motorola Data Solutions

- ◆ Lead engineer on mobile broadband and wireless video surveillance technology trial for the LAPD's anti gang initiative.
- ◆ Deployment team leader for wireless video go-to-market strategy group.
- ◆ Subject matter expert in North America on broadband network coverage modeling.
- ◆ Lead engineer for City of Oakland, CA enterprise application integration project.
- ◆ Responsible for design of City of Long Beach ECOC LAN.
- ◆ Lead engineer for City of Tulsa mobile data and software integration project.
- ◆ Responsible for design and implementation of Motorola mobile data networks across the U.S.
- ◆ Responsible for software integration projects across the U.S.
- ◆ Assisted with roadmap development for various, networks and applications at Motorola.

Education

M.B.A. Business Administration

University of Phoenix, August 2007.

M.S. Computer Networks

Univ. of Southern California (USC), Los Angeles, CA, May 2000.

B.S. Electrical Engineering

N.E.D University, Karachi, Pakistan, January 1997.

Jeff Van Dell

**Systems Engineering
Group Leader**

Year of Hire: 1991

**Motorola Professional
Experience:**

7/02 – Present

Systems Engineering Manager

Manage a group of engineers who develop mission critical designs for Northern California and Hawaii customers. Provide mentoring and guidance to the engineering team. Review system designs and proposals for technical accuracy. Perform performance evaluations and other Human Resource functions.

Responsible for large mission critical system designs and customer interface on both presale and postsale projects. Major projects: Placer County P25, Monterey County P25, San Mateo County P25, MERA, East Bay Regional Communications System P25, San Francisco High Performance Data, Kauai County NPSPAC rebanding.

9/00 – 7/02

Product Development Manager

Develop a wireless product portfolio consisting of integration services for Invisix, a Motorola/Cisco joint venture providing wireless IP professional services. Develop integration products consisting of software applications to integrate into wireless carriers networks. Additional responsibilities include:

- Evaluating potential business partners from a technical and business perspective.
- Developing profitable partnerships with third party application developers.
- Creating product documentation to bring wireless application integration solutions to commercialization.
- Deliver professional live demonstrations of wireless applications available through the San Jose demonstration center.
- Implementing new wireless demonstrations for presentation to customers.

2/98 – 9/00

Senior Account Manager

Sold wireless data systems to public safety customers in a \$5M+ territory, including the Northern California, Nevada, and Hawaii regions

- Major projects over \$1M include:
 - City and County of San Francisco
 - City of San Jose

- City of Redwood City

Primary responsibilities:

- Liaison between the customer and Motorola Systems Integration team.
- Exceeded yearly quotas – 103% in 1999; 235% in 1998.
- Created effective and successful customer proposals.
- Developed teaming relationships with third party vendors.
- Trained direct sales force on mobile data products.

4/91 – 2/98

Field Engineer – Senior Systems Engineer

Held various positions from Systems Engineer through Lead Engineer. Responsibilities included designing and implementing RF systems including state-of-the-art voice, data and dispatch systems. Major projects: Alameda County SmartNet Trunking, City of Redwood City, Placer County Data, Northern California University of California campuses SmartNet Trunking.

Blair Vincent

Senior Program Manager

Motorola Inc.
6450 Sequence Drive
San Diego, CA, 92121
714-595-1296

Date of Hire:

October 2001

Motorola Professional Experience:

Experienced in leading the development, testing and implementation of large system integration projects. Certified Project Management Professional (PMP).

3/09 to Present

Project Manager, County of San Mateo Office of the Sheriff Project 25 Radio Communications System Upgrade

As Project Manager, managing design, testing and installation of ASTRO 25 Platform System upgrade with Central controller and voice/data switching equipment. Includes SmartX integration of T-band SmartZone 4.1 system, and upgrading gold elite consoles. Managing (4) technical staff.

6/09 to Present

Project Manager, City and County of San Francisco Enhanced Wireless Data Network Phases 6 & 7

As Project Manager, managing migration of the existing SmartZone system to Project 25, proving SmartX integration, and upgrading 47 consoles. Installing an IP ASTRO 25 Voice 700 MHz system. Managing (4) technical staff and (2) subcontract companies.

4/08 to 10/09

Project Manager, City and County of San Francisco Enhanced Wireless Data Network Phases 1-5

As Project Manager, managed design, testing and installation of a standards-based high speed mobile data system to support data and Project 25 voice capabilities for multiple agencies and jurisdictions. Managing (5) technical staff and (2) subcontract companies.

7/07 to 1/08

Project Manager, City and County of San Francisco 800 MHz band Reconfiguration Proposal

As Project Manager, led the project team for completing the detailed design, schedule, deployment and cut-over plan to reconfigure the infrastructure and subscribers of City and Count of San Francisco radio communications system.

1/06 to 7/07

**Project Manager, Los Angeles Police Department (LAPD)
Jordan Downs Wireless Video Solution**

As Project Manager, managed video surveillance and video archival project with MESH network. The project provides (10) cameras and a wireless broadband network (MESH), Canopy, and mobile client applications. Equipping 20 vehicles with video surveillance software and Mobile Video Enforcer (in-car video). Managing (4) technical staff and (2) subcontract companies.

1/06 to Present

**Project Manager, Los Angeles Police Department (LAPD)
SMART Car Project**

As Project Manager, managed SMART Car design, testing, installation and integration of ALPR (license plate recognition), Mobile Video Enforcer (in-car video), Mobile Automatic Fingerprint Information System (AFIS), and wireless broadband network (MESH). The SMART Car has been demonstrated by LAPD at several national conferences including IACP in Boston, MA.

8/06 to Present

**Project Manager, Orange County Fire Authority (OCFA)
Regional Data System Upgrade**

As Project Manager, managed design, testing, and installation of the Data System Upgrade. The upgrade includes combining two independent DataTAC networks; OCFA and Metro NET so the channels can be shared by both Agencies. The project also includes two new sites and Radio-IP middleware solution.

1/04 to 1/06

Project Manager, City of Oakland, CA Police & Fire

As Project Manager, successfully managed a \$20 Million project for City of Oakland Public Safety system. The integrated system includes CAD and AVL, Records Management, Jail Management, Mobile Data Systems including Mobile Dispatch, Records and Report Writing. The system includes (12) interfaces to external systems. Managed (3) Project Managers, (8) technical staff and (2) subcontractor companies.

7/05 to 12/05

Project Manager, Broward County, FL Police & Fire

Provided management oversight to an \$10 Million project for Broward County, FL. The integrated system includes CAD and AVL, Records Management and Mobile Data Systems including Mobile Dispatch, Records and Report Writing. Managed (2) Project Managers, (6) technical staff and (2) subcontractor companies.

1/05 to 1/06

Manager of Project Management – Public Safety Systems

Managed (15) Project Managers. Provided management oversight to (20) Motorola large-scale CAD and AVL, Records Management

	and Mobile Data System projects. Such projects include LAPD, City of Miami, Miami-Dade, Hong Kong Police, Honolulu Police etc.
Other Professional Experience:	<i>IBM, 1999-2001</i> Project Manager, Toyota Sales Project Manager, managed the Toyota web-based automotive parts tracking application that provided over 10,000 users with a web-based application to track the order status of automotive parts from Toyota suppliers. Managed (25) developers and led development, testing and implementation. <i>Deloitte Consulting, 1996-199</i> Project Manager, Los Angeles Welfare System Project Manager, managed data collection module for the Los Angeles County Welfare System project that provided 1,000 on-line users with a customized welfare system. Managed (12) developers, defined system requirements, and led the development, testing and implementation Project Manager, Kaiser Permanente Foundation Systems Project Manager managed the electronic media module for Kaiser Permanente Foundation Systems a \$120 Million project that provided a statewide billing and collection system supporting over 10 Million health-plan members. Managed (8) developers and (6) Customer testing staff, defined system requirements, and led the custom application development, testing and implementation.

Year of Hire:

1985

Motorola Professional Experience:

A Project Management Professional and Senior Leader with extensive Government and Commercial markets experience delivering highly complex telecommunications solutions across North America. Significant experience developing opportunities through client relationship building, developing bid response, defining strategy and converging client requirements with proposed solutions through scope, budget, schedule and technological compliance. Multiple experiences leading the delivery of complex Public Safety and Commercial land mobile radio solutions including complete site development, fixed network equipment installation, dispatch center integration of consoles, CAD, phone systems and furniture, as well as, end user delivery of mobile and portable radio equipment, user training and performance testing. Provides demonstrated leadership in team formation, performance management and overall development of project and department teams to build bench strength across the Project Management profession that deliver results.

2006 - present

Director of Integration Services

Senior Director responsible for the Government & Public Safety Integration Services business including pre-sale and post-sale delivery of complex and emerging technology projects. My team of Project Management professionals manage the delivery of complex and emerging technology projects to our most strategic customers in the Government & Public Safety enterprise.

2001 - 2006

Area Manager – Project Management

As Area Manager I reported to the Director of Project Management and was responsible for all Government and Commercial Market telecommunications projects delivered in Kentucky, Indiana, Michigan and Ohio. I managed a team of over 20 field Project Managers and Engineers who delivered dozens of projects annually. Our project portfolio consisted of multi-site County-wide 800MHz simulcast solutions to single site solutions for commercial customers. In addition we managed the development of new towers sites, consulted on regulatory licensing (Local, State and Federal), provided end user training, performed coverage and functional testing and managed the manufacture, delivery, installation and acceptance of all sold systems within our territory.

1990 – 2001

Project Management

Project Manager responsible for delivery of projects of ever increasing scope and value over a 10 year period. My portfolio of projects included the following high-lights -

- Five state deployment of 52 site vehicle telemetry system built upon an existing 800 MHz SMR network
- Multiple UHF/VHF/800 systems delivered to small municipalities throughout southwestern Michigan
- 800 MHz, 10-site system with complete site construction, dispatch & subscriber radios to a major County.
- Delivered 48 single site 900 MHz systems to multiple Ford, Chrysler and GM assembly plants across North America
- Managed multi-million dollar Public Safety communication system deployments for large County's and City's in Kentucky, Ohio and Michigan.

U.S. Department of Commerce
1401 Constitution Avenue, NW
HCHB, Room 4887
Washington, DC 20230

Dear Secretary Strickling:

This letter is written in support of the multi-jurisdictional Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of San Francisco Bay Area public safety organizations to fund the Bay Area Wireless Enhanced Broadband (BayWEB) System. BayWEB is a regional 4G LTE broadband system that will provide the broadband coverage and capacity needed to respond to a disaster. BayWEB will enhance the capability of the Bay Area Regional Interoperable Communications System (BayRICS).

The San Francisco Bay Area is at risk of several major events--natural and man-made. This underscores the need for a seamless regional communications system. In my view, as a field incident commander, the ability to have expanding communications between regional agencies during large-scale incidents is absolutely vital. Anything less can endanger lives and will affect any public safety entity's response time when trying to assist another jurisdiction.

The Oakland Police Department supports funding for BayWEB. Thank you for your consideration.

Sincerely,

A handwritten signature in dark ink, appearing to read "Anthony W. Batts".

Assistant Secretary and Administrator
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
HCHB, Room 4887
Washington, D.C. 20230

Dear Assistant Secretary Strickling:

I am pleased to support the Broadband Technology Opportunities Program grant application submitted on behalf of Motorola and multi-jurisdictional public safety organizations within the San Francisco Bay Area. This application is for the Bay Area Wireless Enhanced Broadband (BayWEB) project, which would deploy a comprehensive Middle Mile network that will enlarge the interoperability of communications for emergency responders utilizing LTE broadband technology and offer wireless broadband service to community anchor institutions, households, and businesses. As the Marin County Superintendent of Schools, I fully support this effort to improve communication for emergency responders in our community. I am hoping that this may result in additional resources to support a needed upgrade to the radio system that will allow our schools to become a part of the Marin Emergency Radio Authority (MERA).

The need for regional broadband communications has never been more essential. The Bay Area is susceptible to earthquakes, coastal flooding threats, and wildfires and is one of the highest risk areas for terrorism attacks. To address these challenges, the Bay Area requires a state-of-the-art, interoperable public safety network for emergency responders. Broadband providers currently confront numerous obstacles in offering service in the Bay Area, which consists of dense urban, suburban, and very rural areas and which has been hard hit by the current economic crisis. To overcome these obstacles, the Bay Area needs a vibrant Middle Mile broadband network that providers can use to offer affordable broadband service to community anchor institutions and end-user customers.

Thank you for your consideration of the BayWEB application. Please do not hesitate to contact me at (415) 499-5801 should you have any questions about my support.

Sincerely,

MARY JANE BURKE
Marin County Superintendent of Schools

Washington, DC 20230

Re: BayWEB Application for BTOP Funding

Dear Secretary Strickling:

I am writing to provide the California Public Utilities Commission's strong support for the application of the Bay Area Public/Private Partnership for BTOP funding for its public safety broadband system. The Partnership is seeking BTOP funding to build the Bay Area Wireless Enhanced Broadband (BayWEB) System, a regional 4G LTE broadband system utilizing existing public safety infrastructure investments where feasible.

The Commission has been part of a broad coalition of key stakeholders across California that are developing a shared vision for emergency communication in the state. This vision includes the creation of robust, sustainable broadband networks throughout the state that will enable first responders and those they depend on to communicate with each other and access critical information in a time of need.

We strongly support the BayWEB application for the following reasons:

- (1) Through this proposal, the San Francisco Bay Area will be able to take the first step towards providing a standards-based 700/800MHz shared public safety radio system which will support both voice and data interoperability. This is a collaborative multi-jurisdictional project that will provide an interoperable communications network for the City and County of San Francisco, City of Oakland, Alameda County, Marin County, Contra Costa County, and San Mateo County.
- (2) For the first time San Francisco Bay Area emergency service first responders will connect on a common data network.
- (3) This is a public-private partnership that will realize significant public benefits.
- (4) The project would take years longer and may not even be accomplished without BTOP funding.

(5) The San Francisco Bay Area is identified as one of the highest risk areas for disasters in the country. As the Bay Area is comprised of numerous related geographic communities it is vital to be able to communicate between agencies in response to a critical incident or disaster. BayWEB is a multi-jurisdictional project of ten Bay Area counties and will support regional public safety first responders by enhancing emergency communications in this top risk area.

I urge you to give this application your strongest consideration.

Sincerely,

Paul Clanon
Executive Director

United States Department of Commerce
1401 Constitution Avenue, NW
Washington, D.C. 20230

March 15, 2010

Dear Honorable Mr. Strickling,

The South Bay Regional Public Safety Training Consortium is pleased to offer our support and encouragement of the Bay Area Public/Private Partnership for a Public Safety LTE 4G Broadband system and an alternative high speed internet system for use by anchor institutions and private citizens. We understand the regional solution is a collaboration of the Bay Area's 10 counties and 100 cities.

South Bay Regional PSTC is a Joint Powers Agency representing eight community colleges in California's central coast areas, from San Francisco to South of Monterey. We provide high quality public safety training for the region's criminal justice community and those aspiring for those careers. A key program we offer is that of public safety communications & dispatch. A review of the proposed Broadband system and the alternative high speed internet system would have widespread valuable operational and educational impact in our widely diverse communities. As you are aware the region is home to Silicon Valley and its large metropolitan cities (San Francisco Bay Area) as well as significantly large open rural areas. Many of these rural areas either have no internet service available or only one option to choose from.

It is our sincere hope that the NTIA finds merit with our regional application submission to BTOP grant funds; thereby agreeing that funding our region's request will improve the quality and degree of public safety services in this area as well as providing our citizens an affordable and reliable alternative for high speed internet access.

I urge you to give this application your strongest consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven T. Cushing".

Dear Assistant Secretary Strickling:

I am writing in support of the proposed Broadband Technology Opportunities Program (BTOP) grant application by the San Francisco Bay Area for the Bay Area Wireless Enhanced Broadband (BayWEB) System. BayWEB is a regional LTE broadband system that will allow first responders from various disciplines the ability to communicate and efficiently share information by utilizing advanced applications for an effective response and recovery in the event of disasters.

In order to improve emergency planning and response, the ten Bay Area counties have joined together for this BAYWEB project. This project will have a significant impact on public safety emergency communications by providing a common broadband system in which Police, Fire, and EMS first responders throughout the Bay Area can communicate, thereby improving the quality and degree of public safety services in the San Francisco Bay Area.

Your close review and consideration of this grant application is appreciated.

Sincerely,

A handwritten signature in black ink that reads "Josh Davies".

Dear Honorable Assistant Secretary Strickling:

The San Francisco Police Department is pleased to support the proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area. This public/private partnership will provide a regional public safety network, BayWEB (Bay Area Wireless Enhanced Broadband), which will build on previous public safety infrastructure investments. If approved, this multi-jurisdictional public safety collaboration intends to use these funds to enhance first responder data communications throughout the San Francisco Bay Area.

As the Chief of Police for the City & County of San Francisco, I understand firsthand the value of reliable communication and coordination in the event of a critical incident, especially between responding agencies. The San Francisco Bay Area makes up one of the top risk areas of the Nation. The inability to communicate can weaken first responder capabilities and in essence endanger the lives of the people we have vowed to protect and serve.

It is of the utmost importance that, in the event of a disaster, our public safety first responders have the ability to work together to protect and save lives in our communities. BayWEB will provide a reliable system that will provide the capacity and capability to support today's and future public safety applications. We very much appreciate your consideration of this multi-jurisdictional mutual aid project and urge your support with a favorable review of our BTOP application.

Sincerely,

George Gascon
Chief of Police

Honorable Strickling:

The Alameda County Fire Department is pleased to support the proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area. BayWEB (Bay Area Wireless Enhanced Broadband), a regional public safety broadband network, will provide 4G LTE mobile data communications with the capacity and reliability required by our first responders when responding to a disaster, natural or man-made. This project will directly benefit the Alameda County Fire Department by expanding our current mobile data capabilities.

As the Fire Chief of the Alameda County Fire Department, I have direct experience on how imperative it is to be able to communicate among local first responders during a critical incident or disaster. Anything less can impair first responder capabilities and make disaster mitigation that much harder.

The need for regional broadband communications has never been more essential. The Alameda County Fire Department supports funding towards this objective. We appreciate your consideration for this multi-jurisdictional and multi-disciplinary broadband communications project.

Sincerely,

Sheldon D. Gilbert
Fire Chief

Dear Honorable Strickling:

I am writing you in support of the Bay Area Public/Private Partnership for BayWEB (Bay Area Wireless Enhanced Broadband), a Regional LTE Broadband System. This project will directly benefit the Bay Area Rapid Transit Police Department by expanding our current mobile data capabilities. With the high speed capabilities of a LTE 4G Broadband system we will be able to provide a wide array of media to our first responders, such as real-time video and information sharing capabilities. This Regional solution is a collaboration of the Bay Area's 10 counties and over 100 cities.

As Police Commander, I have witnessed how vital it is to be able to communicate between agencies in response to a critical incident or disaster. This regional application will help provide the much needed reliable broadband coverage and capacity required when responding to a disaster natural or man-made within the BART system above or below ground.

Although a Broadband LTE 4G System won't solve all our issues that the regions first responders deal with everyday, it will provide a basis for us to work towards allowing the data sharing to and from our first responders which is crucial to maintaining the safety of the region.

The need for regional broadband communications has never been more essential. The BART Police Department supports funding towards this objective. We appreciate your consideration for this multi-jurisdictional and multi-disciplinary communications project.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Hartwig", written over a horizontal line.

Dear Honorable Strickling,

This shall serve as my endorsement of the proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area. BayWEB (Bay Area Wireless Enhanced Broadband), a regional public safety broadband network will provide 4G LTE mobile data communications with the capacity and reliability required by our first responders when responding to a disaster, natural or man-made.

As Chief of the San Francisco Fire Department, I have direct experience on how imperative communication is between local first responders during a critical incident or disaster. Anything less can impair first responder capabilities and make disaster mitigation that much more difficult.

The need for regional broadband communications has never been more essential. The San Francisco Fire Department supports funding towards this objective. We appreciate your consideration for this multi-jurisdictional and multi-disciplinary broadband communications project.

Very truly yours,

Joanne Hayes-White
Chief of Department

City and County of San Francisco

Washington, D.C. 20230

Dear Assistant Secretary Strickling;

I write in support of the Bay Area UASI Program's proposal for a Broadband Technology Opportunities Program (BTOP) grant to expand current mobile data capabilities through the San Francisco Bay Area Wireless Enhanced Broadband System (BayWEB).

It is my understanding that, if funded, BayWEB will build a resilient broadband network through a public-private partnership. The proposed project is a collaboration of the ten Bay Area counties and will have a significant impact on public safety emergency communications.

As Sheriff of San Francisco, I appreciate the value of local first responders being able to communicate with one another and coordinate activities effectively during an emergency. This multi-jurisdictional collaboration will help us serve and protect millions of Bay Area residents.

I urge you to give the Bay Area UASI Program's proposal every consideration.

Sincerely,

Washington, D.C. 20230**

Dear Honorable Strickling:

The Foothill-DeAnza Community College District Police Department is pleased to offer our support and encouragement of the Bay Area Public/Private Partnership for a Public Safety LTE 4G Broadband system and an alternative high speed internet system for use by anchor institutions and private citizens. We understand this regional solution is a collaboration of the Bay Area's 10 counties and 100 cities.

The San Francisco Bay Area is widely diverse consisting of densely populated cities and significantly large open rural areas. Many of the rural areas either have no internet service available or only one option to choose from.

It is our sincere hope that the NTIA finds merit with our regional application submission for BTOP grant funds; thereby agreeing that funding our request will improve the quality and degree of public safety services in the region as well as providing our citizens an affordable and reliable alternative for high speed internet access.

I urge you to give this application your strongest consideration.

Very truly yours,

A handwritten signature in black ink that reads 'Ronald J. Levine'.

Dear Secretary Strickling,

The Marin County Department of Public Works is pleased to offer our support and encouragement of the Bay Area Public/Private Partnership for Bay Area Wireless Enhanced Broadband (BayWEB), a Regional Long Term Evolution (LTE) Broadband System. This Regional solution is a collaboration of the Bay Area's 10 counties and over 100 cities.

The San Francisco Bay Area is one of the highest risk areas for disasters in the country. In order to improve emergency planning, the lead agencies in the Bay Area have joined together in a multi-jurisdictional public safety partnership. BayWEB will help provide the much needed broadband coverage and capacity required when responding to a disaster whether natural or man-made.

We urge you to give this application your strongest consideration. If you have any questions, please do not hesitate to contact me at (415) 499-6570.

National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
HCHB, Room 4887
Washington, DC 20230

Dear Honorable Strickling,

Please consider this my endorsement for the proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area to fund the Bay Area Wireless Enhanced Broadband (BayWEB) System. BAYWEB is a 700MHz LTE public safety broadband network and a subsystem to the larger Bay Area Regional Interoperable Communications System (BAYRICS) which spans the ten Bay Area counties. This broadband network will provide the much needed broadband coverage and capacity needed when responding to a disaster and will enhance the Bay Area Regional Interoperable Communications System (BayRICS) capability.

The San Francisco Bay Area is widely diverse consisting of densely populated cities and significantly large open rural areas. This region has many high profile targets for both domestic and foreign terrorism as well as a high likelihood of natural disasters. It is imperative that public safety first responders have the ability to work together to protect and save lives in our communities during a critical incident. BayWEB will provide a regional standards-based 700MHz shared public safety broadband 4G LTE system and will build on previous public safety infrastructure investments.

The bay area is challenged by the lack of disaster resilient broadband communications during an event of an emergency or disaster. The allocation of the BTOP funds to this region will enhance the foundation which has already been laid by other infrastructure projects. Funding BAYWEB will ultimately support the underserved regional public safety first responders and underserved anchor or public entities critical to disaster communications and recovery.

In my role as the Executive Director of the EBRCSA (East Bay Radio Communication System Authority), I urge you to give this application your strongest consideration.

Sincerely,

A handwritten signature in black ink that reads "William J. McCammon". The signature is fluid and cursive, with a long horizontal line extending from the end of the name.

Washington, DC 20230

Dear Mr. Strickling:

I am writing in support of the Bay Area Wireless Enhanced Broadband (BayWEB) System, which is a public/private partnership for a regional LTE 4G broadband system. This multi-jurisdictional public safety collaboration will leverage an existing public safety network to expand broadband services in ten counties and over 100 cities in the San Francisco Bay Area.

As the Sheriff of San Mateo County, I know firsthand how important it is for public safety first responders to have the ability to work together to protect and save lives in our communities during a critical incident. The goal of BayWEB is to make sure that these local first responders have access to an interoperable communications network so they are prepared and equipped to address any disastrous event that may occur in the San Francisco Bay Area.

I urge you to give this application your strongest consideration.

Sincerely,

Greg Munks
Sheriff

National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW HCHB, Room 4887
Washington, DC 20230

Dear Secretary Strickling:

The Contra Costa County Office of the Sheriff is pleased to support the proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area for the Bay Area Wireless Enhanced Broadband (BayWEB) System. This public/private partnership will provide a regional public safety network, which will enhance first responder data communications throughout the San Francisco Bay Area.

In order to improve emergency planning and response, the ten Bay Area counties have joined together for this collaborative project. I know the value of emergency preparedness and response as well as the importance of working together to effectively plan for, react to, and recover from critical incidents. It is imperative that local public safety first responders have a seamless communications network; anything less can impair their capabilities and make disaster mitigation that much harder.

Thank you for your close review and consideration.

Sincerely,

WARREN E. RUPF, Sheriff

The Honorable Lawrence Strickling
Assistant Secretary and Administrator
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
HCHB, Room 4887
Washington, DC 20230

Honorable Strickling,

This letter is to endorse and support the proposed Broadband Technology Opportunities Program (BTOP) grant application by the San Francisco Bay Area. The BTOP funding will help the region's public safety community build and operate a 4G broadband system providing high speed access for various institutions throughout the Bay Area region.

Through this proposal, the San Francisco Bay Area will begin the work towards providing a standards-based 700MHz shared public safety broadband 4G LTE system providing broadband data interoperability. This is a collaborative multi-jurisdictional project that will provide a data communications network for the City and County of San Francisco, City of Oakland, Alameda County, Marin County, Contra Costa County, Santa Clara County and San Mateo County. This shared network will build on previous public safety infrastructure investments.

As the Deputy Under Secretary of the California Emergency Management Agency (CalEMA) I know the value of emergency preparedness and response. It is of the utmost importance that each jurisdiction in California has the capacity to work together effectively to plan for, react to, and recover from critical incidents regardless of size and complexity. Equally significant is each region's ability to protect key assets and critical infrastructures. It is imperative that preventative and protective measures are taken to counteract terrorism, increase mission critical operations, and minimize the damage from natural disasters in the San Francisco Bay Area. It is of extreme importance that in the event of a disaster, our public safety first responders have the ability to work together to protect and save lives in our communities. During the recovery stages non public safety users working to restore our communities will be permitted to operate on this regional mutual aid asset. Funding from this grant will allow us to make this vision possible in the San Francisco Bay Area Region.

I support BTOP funding for this multi-jurisdictional mutual aid project because it's an important step to improving the management and coordination of emergency response in the San Francisco Bay Area.

Sincerely,

Robert Samaan
Deputy Under Secretary
California Emergency Management Agency (CalEMA)

March 12, 2010

The Honorable Lawrence Strickling
Assistant Secretary and Administrator
National Telecommunications and Information Administration
United States Department of Commerce
1401 Constitution Avenue, NW
Washington, D.C. 20230

Dear Assistant Secretary Strickling,

I am writing you in support of the Bay Area Public/Private Partnership for BayWEB (Bay Area Wireless Enhanced Broadband), a Regional LTE Broadband System. This project will directly benefit public safety agencies in Santa Clara County by expanding their current mobile data capabilities. With the high speed capabilities of a LTE 4G Broadband system we will be able to provide a wide array of media to our first responders, such as real-time video, building blue prints, mapping information as well as information sharing capabilities. This Regional solution is a collaboration of the Bay Area's 10 counties and over 100 cities.

As a Police Chief, I have witnessed how vital it is to be able to communicate between agencies in response to a critical incident or disaster. This region is widely diverse, in that there are areas of densely populated cities, significant large open rural areas, and a surrounding network of streams and tributaries that lead to the San Francisco Bay. This regional application will help provide the much needed reliable broadband coverage and capacity required when responding to a disaster natural or man-made.

I urge you to take our region's many risks into account, and favorably review our submission. Thank you for your time and consideration.

Sincerely,

A handwritten signature in blue ink that reads "Scott R. Seaman".

Dear Honorable Strickling:

This shall serve as my endorsement of the proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area for the Bay Area Wireless Enhanced Broadband (BayWEB) System. BayWEB is a regional 4G LTE broadband system that will provide the much needed broadband coverage and capacity for responding to disasters. BayWEB will enhance the Bay Area Regional Interoperable Communications System (BayRICS) capability.

This project will directly benefit the Oakland Fire Department and the Bay Area region by expanding our current mobile data capabilities. With the high speed capabilities of an LTE 4G Broadband system, we will be able to provide a wide array of media to all our first responders, such as real-time video, building blueprints and mapping information, as well as information sharing capabilities.

As the Chief of the Oakland Fire Department, I know firsthand how imperative it is for local and regional first responders to be able to communicate during a critical incident or disaster. Anything less can impair first responder capabilities and make disaster mitigation that much harder.

The need for regional broadband communications has never been more essential. The Oakland Fire Department supports this funding request and would appreciate your consideration for this multi-jurisdictional and multi-disciplinary broadband communications project.

Sincerely,

A handwritten signature in blue ink, appearing to read "Gerald A. Simon".

Honorable Strickling,

This letter is to support the multi-proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area to fund the Bay Area Wireless Enhanced Broadband (BayWEB) System.

BayWEB is a multi-jurisdictional public safety collaboration between Alameda, Contra Costa, Marin, Napa, Santa Clara, Santa Cruz, San Mateo, San Francisco, Solano, and Sonoma that will tackle the critical communications challenges faced by local first responders. BayWeb will provide a regional 4G LTE public safety broadband system that will provide the much needed broadband coverage and capacity for responding to a disaster. This project will enlarge the interoperability of public safety communications across the region and enable emergency responders to have broadband access to mission critical information which will improve the delivery of health and safety services to millions of California residents.

I support the efforts of the San Francisco Bay Area in the pursuit of providing the most effective regional broadband system.

Sincerely,

A handwritten signature in cursive script, reading "Laurie Smith".

Honorable Strickling,

Please consider this my endorsement for the proposed Broadband Technology Opportunities Program (BTOP) grant application submitted on behalf of public safety organizations within the San Francisco Bay Area. Funding from this grant will go towards the Bay Area Enhanced Broadband (BayWEB) System which will provide a universal broadband system in which Police, Fire, and EMS first responders throughout the Bay Area can communicate with one another.

In order to improve emergency planning and response, the ten Bay Area counties have joined together for this collaborative project. The Bay Area region has many national iconic landmarks which rate high for both domestic and foreign terrorism along with natural threats such as earthquakes and wild fires. The San Jose Fire Department is committed to serving the community by protecting life, property, and the environment through prevention and response. BayWEB will provide high speed broadband services and enhanced interoperable communications and information sharing capability throughout the region. It is of the utmost importance that local first responders have this type of expandable communications available between regional agencies during large scale incidents.

I respectfully ask that you give this application your full and favorable review.

Sincerely,
