7. Project Title and Project Description

Project Title: Nebraska Library Public Computer Centers

Project Description: This project will enhance broadband and computer center capabilities in 147 of Nebraska's libraries serving low-income, aged and underserved broadband communities. These libraries will meet the strong demand for free public computer access and deliver rich Internet and computer literacy skills, career advancement, distance education, health information and e-government training programs.

8. Other Applications

Is this application being submitted in coordination with any other application being submitted during this round of funding?

- No

Easygrants ID	Project Title

If YES, please explain any synergies and/or dependencies between this project and any other applications.

9. Is the Applicant exempt from the Department of Commerce requirements regarding individual background screening in connection with any award resulting from this Application?

- Yes, Applicant is exempt because it is a unit of a state or local government

If the answer to the above question is "No," please identify each key individual associated with the Applicant who would be required to complete Form CD-346, "Applicant for Funding Assistance," in connection with any award resulting from this Application:

Name	Title	Employer

B. Executive Summary, Project Purpose and Benefits

Essay Question

10. Executive Summary of the proposed project:

Problem Statement

Communities throughout Nebraska face a significant gap in access to adequate broadband Internet and computer services. For example, a large number of low income citizens cannot afford home broadband adoption and a high population of senior citizens does not understand the importance of these technologies. This lack of reliable Internet and computer access prevents these people and others from benefitting from valuable job search and job skills training, educational opportunities, crucial e-government information and high-quality health information.

Libraries throughout Nebraska address this challenge in their communities by offering free public access computer services. However, with the number of annual visits to Nebraska's libraries growing by 34% from 2003 to 2008 and the state having the fourth highest per capita use of Internet computers in public libraries, Nebraska libraries are struggling to meet high demand.

As a result, low-income, unemployed, aged and other populations that need free public computing services have insufficient access to broadband Internet on inadequate and outdated computers. In a survey of Nebraska libraries, 84% said that patrons experience significant wait times in a typical week, with 61% noting that patrons experience these waiting times four or more times per week. Furthermore, nearly one-half of computers in surveyed libraries were installed four or more years ago, making most computer performance sluggish for many of today's applications. In terms of Internet access, 53% (versus 17% nationally) of these libraries have broadband Internet service with a maximum speed of less than 1.5 megabits per second.

The story of Wymore Public Library, one of the public computer centers selected for this project, illustrates the problems caused by this inadequate access. Wymore's computing center users

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

have multi-faceted needs: school children are bused to the library each day to complete their homework via an after-school program; unemployed persons fill out online forms to receive benefits; the local Army Reserve Unit uses the library's computers for training and test taking; the general public increasingly uses applications like Skype to speak to relatives located abroad; the local fire department uses computer time for training members; and senior citizens often express the desire to take basic computer courses.

But with just six computers and an Internet access speed of .5 Mbps, Wymore Public Library, like many others throughout Nebraska, is challenged to meet these needs. People are limited to just 30 minutes of computer use time, some groups are forced to use computers at odd hours when the library is closed, and bandwidth intensive applications such as online video and Internet telephony are often unusable.

Addressing the Need

The Nebraska Library Commission (NLC) seeks to transform the broadband and computing capabilities in 147 of 290 Nebraska's library outlets. These libraries were selected because they serve communities with high proportions of vulnerable and underserved populations. 143 of the libraries serve communities with a median income below the national average, and more than 70% are located in underserved communities where estimated home broadband penetration is 40% or less. These libraries serve 86% of all low income areas in Nebraska and 52% of Nebraska's underserved broadband communities. Additionally, Little Priest Tribal College/Winnebago Public Library is included, serving the federally-recognized Winnebago tribe.

Libraries will be provided with a total of 1,096 new or replacement computer workstations equipped with office suite and security software, 45 broadband speed upgrades from existing service providers, and peripheral equipment, including 136 printers, 95 scanners and 73 video projectors. A detailed survey of current capabilities, user need and future demand of the project's 147 library public computer centers drive these proposed upgrades.

This technology will be supplemented by training programs in the areas of Internet and computer literacy, career advancement, economic development, distance education, health information and e-government. Key project partners – such as Central Community College, Nebraska Department of Labor, the Center for Rural Entrepreneurship, University of Nebraska-Lincoln

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

Extension, and the National Network of Libraries of Medicine – will facilitate these programs. Library computer center locations will serve as the delivery platform for these programs by providing patrons with access to audio and video webinar content and interactive computer-based training. Furthermore, library staff will be trained by these expert partners so that they can continue to support these efforts after the grant period ends.

These enhanced computer centers and programs will combine to enable the project to achieve five primary goals:

- 1) Enhance Internet and computer literacy
- 2) Create opportunities to increase income status
- 3) Increase educational access and opportunities
- 4) Improve access to health information, with emphasis on seniors
- 5) Improve access to e-government information for vulnerable populations

Increasing the number of computers and equipment alone will instantly address the unsatisfied demand of current users, but this project also seeks to do more. The project will drive new users, particularly from vulnerable and underserved populations, to the library by increasing awareness of services in local communities and making centers more accessible. This will be accomplished by providing materials in 9 languages for English Language Learners (ELL), supplying 59 American Disabilities Act (ADA)-compliant workstations to libraries that do not have them to improve computer/broadband access for persons with disabilities, and providing programs and training on computer literacy and health information access targeted at traditionally underserved populations such as seniors. Additionally, mobile carts that can store laptops will be deployed to 33 public computer centers. This will allow these laptops to be used outside of the library in local communities, including training in other community anchor institutions.

Service Area Information and Demographics

This project will reach 896,763 people, or 47% of Nebraska's total population. Within the project service area, an estimated 572,847 people live in households with a median income below the national median income, 333,249 are seniors, 99,348 are persons with disabilities, and 37,376 speak English as a second language. Little Priest Tribal College/Winnebago Public Library serves 1,435 Native Americans.

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

Overall, we estimate that these library computer centers will receive 258,943 unique visitors, a 41% increase versus the current number of users. We expect 42,726 people to participate in one or more of the training programs we will offer.

Ability to Achieve Intended Results

The NLC team has extensive experience in the areas of project management, technology, federal/state grant procurement and compliance, utilizing relevant federal/state programs, such as E-rate, and marketing. The NLC already works extensively with local library public computer centers and key project partners.

The NLC successfully manages other related public computer center projects of similar in size and scope, including administering \$1.5 million through the federal Library Services and Technology Act State Program; providing administrative and training support for more than \$1.5 million worth of online computer services and products to 200+ libraries; and providing 300+ hours of library training and technology innovation through Technology and Access Services programs.

Furthermore, several metrics will be tracked to ensure the project meets its objectives and solves defined problems, such as computer wait times; number of new library public computer center users; and program participation by demographic type.

Jobs Created

We estimate that this project will create 40 jobs. Nine of these jobs will be direct jobs created through BTOP funding for project support roles, including program, compliance and IT management. Remaining jobs will be indirect or induced based on project spending. Training for individuals on job search and skills and for entrepreneurs and small businesses on business development will spur additional career and economic opportunities.

Cost of Project

The total cost of this project is \$3,668,189. Notably, equipment expenditures – such as computers and networking equipment – account for \$2,238,642 of the project cost and broadband service related expenses make up an additional \$292,251. The NLC is seeking

Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

\$2,416,403 in BTOP funding and the remaining \$1,251,786, or 34.1% of project costs, will be provided through a cash match from the Bill and Melinda Gates Foundation.

11. Project purpose:

Most of Nebraska’s libraries serve their communities as free public computer centers and, in many instances, are the only available free Internet and computer access for Nebraska’s high proportion of low income, senior, and other underserved populations. Nebraska has the fourth highest per capita use of Internet computers in public libraries and the number of annual visits to its libraries has grown by 34% from 2003 to 2008. These budget-constrained libraries, however, are struggling to keep up with growing demand for public computer center services.

As a result, citizens cannot access these computers and the Internet when and for how long they need. In a survey of libraries throughout the state, 84% said that patrons experience significant average wait times in a typical week, with 61% noting that patrons experience these waiting times four or more times per week. To combat this, most libraries are left with no choice but to place time restrictions on computer usage.

Nebraska libraries are not only challenged by quantity of bandwidth and computing, but by quality as well. Nearly one-half (48%) of computers in surveyed libraries were installed four or more years ago, making most computer performance sluggish for many of today’s applications. In terms of Internet access, 53% of these libraries have broadband Internet service with a maximum speed of less than 1.5 megabits per second per library building.

This project will transform broadband and computing capabilities of 147 out of 290 library public computer centers throughout Nebraska and delivers new programs and services that address the state’s most pressing needs. This grant will provide these libraries with a total of 1,096 new or replacement computers equipped with office suite and security software, 45 broadband speed upgrades from existing service providers, and peripheral equipment, including 136 printers, 95 scanners and 73 video projectors.

In all, the libraries included in this proposal serve 896,763 people, or 47% of Nebraska’s total population. Each library is located in a community with a high percentage of vulnerable and/or underserved populations. 143 of the libraries serve communities whose median income is below the national average and more than 70% of them are located in underserved areas where

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

estimated home broadband penetration is 40% or less. These libraries serve 86% of all low median income areas in Nebraska and 52% of Nebraska’s underserved broadband communities.

With improved broadband and computing access, along with programs targeted at Nebraska’s vulnerable and underserved populations, the project will achieve five primary goals:

1) **Enhance Internet and computer literacy**
Library staff will receive comprehensive Internet and computer training, so that they can, in turn, train computing center users on basic skills, making these technologies more relevant and accessible to non-broadband and computer users.

Key partners and staff include Central Community College, the Omaha Public Library, project IT staff, and local library training staff.

2) **Create opportunities to increase income status**
The population served will have the opportunity to increase employment opportunities by receiving training on and better access to online job search databases and job skills programs. This will broaden their career opportunities and make people more valuable to employers. Training to develop and energize entrepreneurs will also be offered.

Key partners include the Nebraska Department of Labor, the Center for Rural Entrepreneurship and the Center for Rural Affairs.

3) **Increase educational access and opportunities**
Distance learning is a growing channel for K-12, adult and higher education delivery in Nebraska. Increased broadband speeds will ensure that these distance learners can view all available online learning content.

Key partners include various Nebraska community colleges, Network Nebraska, and the University of Nebraska-Lincoln Extension.

4) **Gain greater access to health information, with emphasis on seniors**
Sufficient broadband speed and Internet/computer literacy is required to access quality health content and services that are increasingly offered online. This creates a particularly acute problem for seniors, many of whom do not subscribe to broadband at home (136 library partners

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

serve communities with a 65+ population above the national average), yet have a significant need for health information. Project program training will educate computer center users on how to search for and access online health information and services.

Key partners include the University of Nebraska Medical Center McGoogan Library of Medicine and the National Network of Libraries of Medicine.

5) Improve access to e-government information for vulnerable populations
Libraries will leverage statewide partnerships, using outreach and support strategies to facilitate use of broadband by vulnerable populations for e-government information. These will result in a better understanding of how to use of online forms, such as tax and court information.

Key partners include the Nebraska State Court Administrator and local Health and Human Services offices.

This project strongly supports three distinct BTOP objectives:

- It ‘provides improved access to broadband service to consumers residing in underserved areas of the country;’
- It provides ‘broadband education, awareness, training, access, equipment and support’ to a library while ‘facilitating the use of broadband services by vulnerable populations;’ and
- It ‘stimulates the demand for broadband, economic growth and job creation.’

The NLC and its library partners will track metrics to ensure the project is successfully addressing the problems described and meeting BTOP objectives. Examples include computer wait times; number of new library public computing center users; and program participation by demographic type.

12. Recovery Act and Other Governmental Collaboration:

Project objectives align strongly with several other Recovery Act programs, particularly in the areas of job-related training, K-12 and higher education, and health information access. This alignment will increase the project’s overall impact.

The NLC’s partnership with the Nebraska Department of Labor is a prime example of how this project leverages Recovery Act programs. The Nebraska Department of Labor, which has received approximately \$54 million in Recovery Act funding to date, will place continued

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

emphasis on job search and skills training through programs such as the Workers Investment Act. The Workers Investment Act uses federal job training funds for adults, dislocated workers and youth, to help qualified candidates find better jobs and increase skills. The Nebraska Department of Labor is committed to using Nebraska's libraries and public computing centers for such training. Nebraska Department of Labor staff will travel to libraries to offer patrons in-person, computer-based assistance, extending the department's reach beyond its 14 regional locations.

Upgraded computer center capacity at libraries will also magnify the impact of Recovery Act grants to the Nebraska Department of Education, which has received \$47 million in funding to date. This funding helps schools extend the number of learning hours per year, allowing students to close achievement gaps through programs such as summer school. Libraries in this project will too be well-positioned to extend the school day with expanded public computing center capacity. Currently, there are 23 schools that have received Recovery Act funding located in our project service area.

This project will also leverage the Department of Health and Human Service's Recovery Act focus on electronic health records (EHRs). The agency's Recovery Act State Health Information Exchange Grant Program, for example, will provide \$564 million in funding to create EHR networks across providers to facilitate the exchange of health information and e-prescriptions. Program partners such as the National Network of Libraries of Medicine will support these efforts by training Nebraska's library computer center users on how to access personal EHRs and transfer of these documents to providers.

Finally, this project leverages other governmental programs, including the Library Services and Technology Act (LSTA), which is used to fund recurring operational expenses. Each year the NLC awards federal funds provided by the Institute of Museum and Library Services to libraries through a competitive grant process. The purpose of the Library Improvement Grants is to facilitate growth and development of technology-based library programs and services in Nebraska public and institutional libraries.

13. Technology Strategy:

This project provides critical enhancements to each library public computer center, including computer and broadband technologies to meet the current and future needs of its patrons. Detailed surveys of current public computer center capabilities and needs of each included

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

location, as well as consultations with IT experts and existing services providers, drove all aspects of technology strategy.

Connectivity

This project will increase broadband access speeds for 45 computer centers, with 40 upgrades to a DSL or an equivalent connection and five upgrades to fiber broadband from existing service providers. DSL or equivalent upgrades will be made to help many libraries reach a bandwidth/workstation goal of 384 Kbps. This target speed, which was determined by consulting with IT experts and analysis of application bandwidth requirements, will provide quality performance for high-bandwidth applications such as online video and distance learning.

Five libraries have agreed to receive fiber connectivity service from existing service providers of at least 10 Mbps dedicated bandwidth. This delivers far greater performance than the non-dedicated bandwidth most libraries have today. To qualify, a library needs minimum of 27 workstations, as these libraries will meet the 384 Kbps/workstation goal. Fiber lines will allow these libraries to scale their broadband connectivity over time as more bandwidth is required.

Libraries that will not be upgraded all have bandwidth speeds greater than 768 Kbps per center and use a combination of DSL, cable, area wireless and T1 connections.

To determine the appropriate internal networking and cabling types, the project team consulted with IT experts and service providers. Libraries will receive 8/12/48 port switches based on the number of new network elements (computers, printers, scanners, etc.) to be added as a result of the project. Each new computer will also be provided with an Ethernet cable to ensure the workstation is equipped to handle current and future bandwidth speeds. IT staff and contractors will be hired to install this equipment.

Hardware and Software

Libraries will receive new and/or upgraded desktop and laptop computers based on a detailed survey of current equipment, level of usage and future needs. The typical desktop will have a 3 GHz processor and 6 GB of system memory (RAM), and the typical laptop will have a 1.6 GHz processor and 4GB of system memory (RAM). These configurations will be sufficient to handle

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

current operating systems and application software. These workstations will include headsets for audio content and communication, as well as standard office suite and security software.

Replacement desktops and laptops will be provided for those workstations that are four years or older, as recommended by experts such as the University of Stanford's IT department. Additional desktops and laptops will be provided based on analyzing survey requests from libraries, current and future computer center usage, and the current size of each computer center.

Thirty-three libraries will receive a "mobile cart," which can store between 6 to 12 laptops and has an integrated wireless and battery system that allows laptops to be charged out of a single outlet. This will enable these libraries to easily manage their laptops for patron use and save significant space. Libraries can expand their public computing center reach and allow for use beyond their standard open hours, including training in other community anchor institutions.

To create greater accessibility for persons with disabilities, libraries will receive an ADA-compliant workstation if they currently do not have one. These workstations include the following: desktop with monitor, keyboard, trackballs, a software package of ZoomText, Kurzweil, JAWS, Window-Eyes and Speech to Text Software, and a hydraulic desk.

Additionally, libraries will receive printers and scanners for patron document creation based on a detailed survey to assign this equipment. Video projectors for group viewing of Webinars and online video will also be provided.

Reliable, Secure and User-Friendly System

Nebraska's library public computer centers provide a safe and secure environment for their customers. This technology plan ensures this environment will be maintained in the following ways:

- Library staff will be trained to provide basic Internet and computer skills training to library customers during specific training sessions or at user request
- Wireless Internet will be provided to allow for maximum flexibility for users of library laptops and for those that bring their own laptops to the library
- Laptops will be provided on a sign-in, sign-out basis with the appropriate security to ensure no loss of equipment

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Submitted Date: 3/15/2010 12:42:18 PM		Easygrants ID: 5073	
Funding Opportunity: Public Computer Centers		Applicant Organization: NEBRASKA, STATE OF	
Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

- Libraries use filtering software based on local needs to guarantee only appropriate content is displayed on public computers
- Security software will protect against viruses and malware and eliminate risks of workstation downtime
- ADA-compliant workstations will offer greater access to persons with disabilities.
- A three-year service plan will ensure up-time on all main equipment

Finally, training will enable library staff to troubleshoot minor computing equipment issues, with either in-house or expert support to be used as needed. Libraries have used staff or local resources in the past to keep its computer center equipment properly functioning, and funds from this grant are dedicated towards training staff for increased support.

14. Public Availability:

Nebraska’s libraries strive to ensure all groups of people, regardless of age, gender, race, or disability status, are equally able to access computer center services. All computer centers included in this application are public libraries, available for use by any member of the public, and there are no restrictions with respect to specific population subgroups at any library.

The vast majority of our libraries (over 80%) have handicapped access. Approximately one-third of our libraries already have ADA-compliant workstations. A portion of the requested federal funding is designated for upgrading ADA stations and adding new stations for libraries currently lacking these facilities. The ADA-compliant workstation we have designed has specific adaptations for the vision-impaired, hearing-impaired and physically disabled.

Our libraries also offer a large variety of educational programs, including computer skills training, job skills training, job search training, language/ELL courses, children’s education, college or graduate education, adult education, business-oriented classes, health information, public safety awareness, online research training, tax preparation and children’s summer reading programs. The variety of programs available caters to children, college students, adult learners, job seekers, and new language learners.

Little Priest Tribal College/Winnebago Public Library has a specific focus on Native American history and culture. Libraries such as these are fundamental to the preservation and continuation of the culture and history of the Native American people, and are a focal point for the local Native American communities.

**Broadband Non-Infrastructure Application
Submission to NTIA – Public Computer Centers**

Task: Submit Application - Public Computer Centers		Applicant Name: Mr. Rod Wagner	

In summary, there are no restrictions relevant to specific populations at this project’s public computer centers, as Nebraska’s library computing centers are among the few institutions which provide services across the whole spectrum of age and ethnicity.

15. Restrictions on Center Use:

- All public computing centers included in this application are open to the public with no restrictions to any particular population group.

16. Involvement of Community College:

Key partnerships with Nebraska community colleges will improve education opportunities for many higher education students. For instance, a partnership with Central Community College, with support from Nebraska’s other community colleges, delivers higher education and adult education classroom curriculum directly to remotely located students throughout the state via library public computer centers.

This partnership is a state-wide expansion of several long-standing relationships between Nebraska’s libraries and community colleges. For example, Alliance Public Library, La Vista Public Library, Broken Bow Public Library, South Sioux City Public Library and South Omaha Public Library all share building space with community colleges. Central Community College offers learning center locations to allow students to participate in its programs closer to home. Five libraries – Cedar Rapids, Clarks, Hastings, Orleans and St. Paul – serve as the locations for these centers.

This project will facilitate community college expansion of distance learning. Central Community College, for example, is seeking to upgrade its classroom video capabilities due to increased demand for online access to classes.

This project ties closely to the mission of Nebraska’s community colleges, which emphasizes applied technology, vocational and occupational education curriculum. This is highly visual curriculum and, as a result, video-based content is particularly important to these institutions.

17. Is the applicant is seeking a waiver of the Buy American provision pursuant to section x.Q of the NOFA?

- No
