Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to convey my support for One Economy's proposal to initiate a Digital Connectors program at Belmont High School and their solicitation for federal stimulus funding.

My office has been working closely with the teams at Belmont High School and One Economy to design and implement both a Digital Connectors program and corresponding community broadband adoption activities. I am excited to offer my support to One Economy as the local host organization for this youth Digital Connectors program. In the coming months, we hope to partner with these groups to facilitate the program's implementation – through helping their efforts to secure matching funds and other financial resources, to reach out to the local community, and to publicize their services.

I appreciate this opportunity to work with One Economy and the Broadband Opportunities Coalition as they work to expand their record of success in digital access issues in both rural and urban communities. With the support of BTOP, One Economy and Belmont High School will together provide broadband education, awareness, training, and support in an underserved and deserving community.

Sincerely,

ERIC GARCETTI
President, Los Angeles City Council
Councilmember, 13th District

Los Angeles, CA
Community Development Technologies Center

August 4, 2009

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of Community Development Technologies Center to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, Community Development Technologies Center will commit to:

- Providing at least 10 working computers, connected to the internet in a room that will be used at least 4-6 hours a week exclusively for the Digital Connector training, located in a secure building with ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting 15 youth ages (14-21) required to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Providing one Public Allies Los Angeles slot to serve as a Digital Connector program coordinator;
- Coordinating community adoption activities for Digital Connectors;
- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project;
- Complying with reporting requirements; and,
- Paying the Program Coordinator and the youth stipends up front, to be reimbursed by One Economy upon invoice by CDTech.

Los Angeles, CA
Community Development Technologies Center

Our ability to offer this program is based on the following support that One Economy has agreed to provide to CDTech and the Digital Connectors Program:

- \$9500 for the Public Ally stipend to serve as Digital Connectors Program Coordinator;
- A partner fee paid to CDTech in the amount \$5000 that covers management of the program, reporting and basic supplies;
- Travel expenses to the mandatory training for the Digital Connectors Program Coordinator of up to \$1200 which may require attending a training as far away as Washington, DC;
- Field trip expenses of up to \$1,000 to local technology companies and college/university tours;
- Digital Connector curriculum; and,
- Technical Assistance from One Economy and bi-monthly webinar trainings with other programs nationwide.

One Economy has also agreed to provide direct support to the program by providing each of the 15 youth participating in the Digital Connectors program with the following incentives and stipend:

- A laptop computer (15)
- A \$500 stipend for the community adoption work they will perform (free computer classes, TA for the center and its clients, outreach) (for each of 15)
- Basic program incentives of t-shirt, flash drive, and a \$125 Flip Camera (15)

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and Community Development Technologies Center together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Denise Fairchild, Ph.D.

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of the East Bay Asian Local Development Corporation (EBALDC) to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption at Lion Creek Crossings.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are full in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

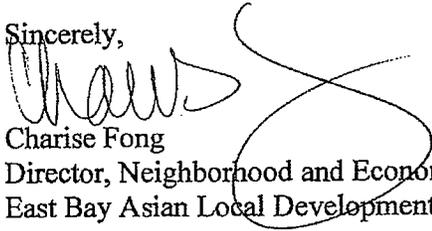

As a partner of this grant, EBALDC will commit to:

- Providing computer labs and equipment in secure buildings with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting the youth ages (14-21) required to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Hiring and managing a paid coordinator dedicated to this initiative;
- Assuring that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinating community adoption activities for Digital Connectors;

- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and EBALDC together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

To Whom It May Concern:

This letter confirms the commitment of Los Angeles Housing Partnership (LAHP) to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, LAHP will commit to:

- Provide computer labs and equipment in secure buildings with ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attract and recruit youth ages 14-21 to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Retain on staff a coordinator dedicated to this initiative;
- Assure that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinate community adoption activities for Digital Connectors;
- Promote the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generate and participate in media activities in support of the project

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of Lawndale Christian Development Corporation to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, Lawndale Christian Development Corporation will commit to:

- Providing computer labs and equipment in secure buildings with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting the youth ages (14-21) required to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Coordinating community adoption activities for Digital Connectors;
- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project

Upon award of the grant, Lawndale Christian Development Corporation commits to providing \$10,000 in support of One Economy's proposal to BTOP to support our local Digital Connector program. These funds will be used as an in-kind donation of classroom space. We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities.

Sincerely,

Kim Jackson
Executive Director

Faith-driven Community Revitalization

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm Alternatives, Inc.'s commitment to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, Alternatives, Inc. is deeply committed to expanding broadband access and adoption to communities who need it most as part of our mission to facilitate personal development, strengthen family relationships, and enhance the community's well-being. Technology plays a critical role in helping low-income individuals advance their own education, obtain job skills, learn about employment opportunities, and improve their connectedness in their community. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, our agency will commit to:

- Providing computer labs and equipment in secure buildings with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting the youth ages (14-21) required to participant in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Hiring and managing a paid coordinator dedicated to this initiative;
- Assuring that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinating community adoption activities for Digital Connectors;
- Promoting the program through our website, newsletters, flyers, and meetings with

4730 N. Sheridan Rd., Chicago, Illinois

--continued--

- government and social service agencies;
- Generating and participating in media activities in support of the project.

This effort is consistent with work Alternatives has already been doing in the community. Through a partnership with local agencies and State government, we offer certification training to young people and serve as a partner in Microsoft's Elevate America Initiative. Upon award of this grant, our agency commits to providing at least \$12,667 in support of One Economy's proposal to BTOT to initiate the local Digital Connector program. These funds will be used to pay instructors, obtain training materials, add computer hardware and software, and cover additional staff training costs

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in urban communities. With the support of BTOP, One Economy and Alternatives, Inc. together will provide broadband education, awareness, training, and support in communities that need it.

Sincerely,

A handwritten signature in cursive script that reads "Judith M. Gall". The signature is written in black ink and is positioned above the typed name.

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of City of Charlestown to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, City of Charlestown will commit to:

- Providing computer labs and equipment in secure buildings preferably with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting the youth ages (14-21) required to participant in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Hiring and managing a paid coordinator dedicated to this initiative;

- Assuring that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinating community adoption activities for Digital Connectors;
- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project.

Upon award of the grant, City of Charlestown commits to providing \$15,000 in support of One Economy's proposal to BTOP to support our local Digital Connector program. These funds will be used to purchase additional video production and editing equipment, provide Digital Connector participants with free Web hosting on the City's server and provide participants in advanced training classes in Web design and video production, led by specialists from local colleges.

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and City of Charlestown together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Bob McEwen

New Directions Housing Corporation

August 6, 2009

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of New Directions Housing Corporation to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

New Directions is also partnering with a BTOP collaborative called Louisville Connected, and we envision that this national linkage with One Economy will help to achieve the Obama Administration's goals for community capacity building, infrastructure advancement and strengthening of public computer centers.

For 15 years, New Directions, as a neighborhood-serving anchor institution, has been leveraging its scattered housing sites as a platform to widen access to technology. With nine computer labs—five of which are designated HUD Neighborhood Network Centers—we are fully aware of the challenges and opportunities in communities to “level the playing field” in education, children's and older person's welfare and health information access.

We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, New Directions Housing Corporation will commit to:

- Providing computer labs and equipment in two secure buildings in Louisville's California Neighborhood, offering onsite parking. Both sites are accessible to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting the youth ages (14-21) required to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;

New Directions Housing Corporation

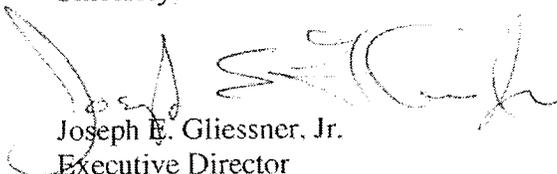

- Identifying a staff person to serve as the designated Digital Connectors Coordinator, and allocating up to 40 hours weekly to this endeavor.
- Assuring that all employees who supervise any youth meet both the city's and the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinating community adoption activities for Digital Connectors in a coordinated fashion with those potentially occurring at our local Urban League;
- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project

Upon award of the grant, New Directions Housing Corporation commits to providing \$7,000 in support of One Economy's proposal to BTOP to support our local Digital Connector program. These funds will be used cover expenses related to the facility usage, materials, insured transportation and meeting expenses. The funds will also cover New Directions Housing Corporation staff time that will be dedicated to the program. Digital Connectors programming will dovetail with a much larger BTOP movement in Louisville, integrating the work of our Community Anchor Institution, the University of Louisville Speed Engineering School and its interns, several community centers and our strong Urban League, as well as New Directions.

Please note that funding for Digital Connectors is not being sought within the University of Louisville Multipurpose Applications, and while described within the local Executive Summary, no match or direct funding from the other application process will be transferred to Digital Connectors. All match is provided from local sources for the Digital Connectors Program.

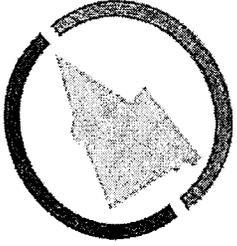

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. Together, will provide broadband access and education, awareness, training, and support in communities across the nation. In Louisville, we also look to grooming Digital Connectors to assume future positions at the Speed Engineering School.

Sincerely,

Joseph E. Gliessner, Jr.
Executive Director

CENTRAL CITY
RENAISSANCE ALLIANCE

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of Central City Renaissance Alliance (CCRA) to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, CCRA will commit to:

- Providing computer labs and equipment in secure buildings preferably with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting the youth ages (14-21) required to participant in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Hiring and managing a paid coordinator dedicated to this initiative;
- Assuring that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinating community adoption activities for Digital Connectors;
- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project

CCRA has funding for a new Community Technology Access Center we are developing in our community. Upon award of the BTOP grant, CCRA commits to providing \$42,000 in match resources in support of an additional year of the Digital Connectors program in Central City. Our funds will be used as detailed below.

CTAC Budget Community Technology Access Center	Existing Budget	Commitment to Digital Connectors
CTAC / DC Program Coordinator	50,000	15,000
CTAC / DC Resource Assistant	40,000	12,000
CTAC Occupancy	22,000	11,000
Training and Staff Development	10,000	4,000
<i>Total</i>		42,000

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and Central City Renaissance Alliance together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Kysia Brown Robinson

COPPIN STATE UNIVERSITY

Institute for Local to Global Community Engagement

August 10, 2009

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of Coppin State University to serve as one of the partners with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption. We understand that One Economy is applying for the Sustainable Broadband Adoption (SBA) track for the BTOP opportunity.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as one of the local host organizations for a youth Digital Connector program.

Although Coppin State University is not able to provide a cash match for the grant, it will collaborate with One Economy to offer the following:

- Provide computer labs and equipment in secure buildings with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attract and recruit young people (ages 14-21) to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;

Office of the President
2500 West North Avenue • Baltimore, Maryland 21216-3698 • Tel. (410) 951-3838 • Fax (410) 333-5369

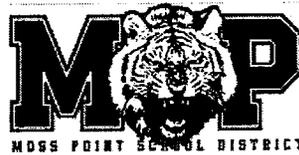

- With funds provided by the grant, hire and manage a paid coordinator dedicated to this initiative;
- Assure that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinate community adoption activities for Digital Connectors;
- Promote the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generate and participate in media activities in support of the project.

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and its partners will work together to provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of Moss Point School District to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

We are fully in agreement with the mission of One Economy and we have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. Like One Economy we have a mission in our district and that is "*To Graduate Empowered World-Class Citizens*". We are pleased and excited to offer our support to One Economy as the local host organization for a Youth Digital Connector program. We understand that many students have additional responsibilities in the afternoon, therefore we have adopted the program and will become a part of the classroom instruction and aligned to our Broadcast and Print Journalism classes pacing guides.

As a partner of this grant, Moss Point School District will commit to:

- Providing computer labs and equipment in secure buildings preferably with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting youth ages (14-21) required to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Hiring and managing a paid coordinator dedicated to this initiative;

4924 Church Street, Moss Point, MS 39563

- Assuring that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinating community adoption activities for Digital Connectors;
- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project

Upon award of the grant, Moss Point School District commits to providing \$10,000 in support of One Economy's proposal to BTOP to support our local Digital Connector program. These funds will be used cover expenses for additional materials and equipment as well as the staff time that will be dedicated to the program.

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and Moss Point School District together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Stephanie Packer

Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of SoBRO to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as the local host organization for a youth Digital Connector program.

As a partner of this grant, SoBRO will commit to:

- Providing computer labs and equipment in secure buildings with onsite parking and ease of access to public transportation for the delivery of the Digital Connector program and the corresponding community broadband adoption activities;
- Attracting and recruiting the youth ages (14-21) required to participate in the program and deliver the planned community broadband adoption activities to the underserved or unserved residents in our community;
- Hiring and managing a paid coordinator dedicated to this initiative;
- Assuring that all employees who supervise any youth meet the state's Department of Public Welfare regulations for employees working with children and youth;
- Coordinating community adoption activities for Digital Connectors;
- Promoting the program through our website, newsletters, flyers, and meetings with government and social service agencies;
- Generating and participating in media activities in support of the project

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and Neighborhood Development Foundation (NDF) together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Fred J. Johnson
Chief Executive Officer

As the Project Structure and Partnerships chart demonstrates, One Economy's Sustainable Adoption project will be a collective effort, involving several renowned national and community organizations. As the lead applicant, One Economy will be responsible for the overall management and supervision of the project.

One Economy's Office of the CEO will also be responsible for managing the relationship between One Economy and the Broadband Opportunities Coalition (BBOC). The BBOC, comprised of nine leading civil rights organizations—including National Urban League, the Asian American Justice Center, League of United Latin American Citizens, National Council for La Raza, National Association for the Advancement of Colored People, and the Joint Center for Political and Economic Studies—will play an integral role in the project, coordinating the public education and awareness campaign.

One Economy will also work closely with over 100 affordable housing developers as a part of its efforts to bring broadband into affordable housing units around the country. One Economy's Access Services department will manage these relationships. In addition, One Economy will also work with many local community organizations across the country. These local organizations will be the primary sites for our Digital Connectors programs. The organizations will also play a role in our public education and awareness campaign. One Economy's Field Operations department will manage these relationships.

The second chart shows One Economy's internal governance and management. All involved departments (External Affairs, Media, and Operations) will report directly to the Office of the CEO, which will provide guidance and ensure the project is making substantial progress.

Several One Economy departments will be heavily involved in the implementation of the program components. Our Marketing Department will oversee the implementation of our outreach and marketing campaign, working closely with BBOC. Our Business Development department, along with Administration, will be responsible for ensuring that all reporting requirements are met.

One Economy's Media Department will be responsible for enhancing and maintaining our online media content on our various web properties, including the Beehive and the Public Internet Channel.

One Economy's Operations Department will oversee all of our programmatic or on-the-ground work, including our Digital Connectors programs and our Access work. The Finance & Administration Department will work closely with Business Development to ensure that all reporting requirements are met.

Small and Disadvantaged Businesses
Letters of Support

- 1) MHR International, Inc.
- 2) Minority Media and Telecommunications Council
- 3) National Black Chamber of Commerce

August 7, 2009

Ray Ramsey
CEO
One Economy Corporation
1220 19th Street, NW, Suite 610
Washington, DC 20036

Dear Mr. Ramsey:

This letter serves as confirmation of the commitment of MHR International, Inc. to partner with and assist One Economy Corporation and its partner, the Broadband Opportunity Coalition (BBOC), in its efforts to expand the adoption of Broadband services to disadvantaged communities. We will provide Minority and Women Business Enterprise Services in an effort to make the program successful.

MHR International is a 17 year old minority-owned business that provides professional project, program and construction management services to public, private, and public-private owners to ensure the successful delivery of capital projects and programs. MHR International is acknowledged as a leader in small business development. In addition to being on the Program Management Team for the 1996 Centennial Olympic Games, the firm has provided consulting services on some of Atlanta and St. Louis's newest high profile projects, including the Hartsfield Jackson International Airport, Atlantic Station, the World of Coca Cola, the Georgia World Congress Center Expansion IV, the Lambert-St. Louis International Airport and the Pinnacle Hotel and Casino. Along the way, MHR International has earned two national DBE Program of the Year awards for the work it has done at the Hartsfield Jackson Airport Development Program, the St. Louis Lambert International Airport.

We have found it enlightening and extremely useful to perform capability assessments or business diagnostics to identify the most significant problem areas impacting a business and identify opportunities for providing meaningful assistance. Historically, MHR International has overseen efforts to award more than \$400 million in contracts to qualified MFBE's.

We appreciate the opportunity to support One Economy in its venture. If additional information or assistance is needed, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael H. Ross", with a long horizontal flourish extending to the right.

e-mail: dhonig@crosslink.net

Dear Colleagues:

I am pleased to confirm the commitment of Minority Media and Telecommunications Council (MMTC) to assist One Economy, and its partner and MMTC's client, the Broadband Opportunity Coalition (BOC), in support of the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Public Computer Centers and for Sustainable Adoption Programming Activities.

Like One Economy, MMTC is deeply committed to expanding broadband access and adoption to communities who need it most. We are pleased and excited to offer our support to One Economy as it continues to expand its youth technology education and engagement program, Digital Connectors.

To assist One Economy in performing the services it will provide under this grant, MMTC will commit to:

- Marshall the resources and support of MMTC's clients and stakeholders – over 70 national civil rights, minority and religious organizations – and their local chapters and affiliates – to extend the reach of those served by Digital Connectors
- Participate in the drafting and evaluation of substantive content to be transmitted through Digital Connectors
- Provide legal support for implementation and process issues falling within the sphere of the Federal Communications Commission and federal telecom and broadband policy.

We appreciate this opportunity to support One Economy in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities.

Sincerely,

David Honig

Re: Letter of Support

Dear Mr. Ramsey:

This letter is to confirm the commitment of the National Black Chamber of Commerce to assist One Economy Corporation and its partner, the Broadband Opportunity Coalition (BBOC), in its attempt to expand sustainable adoption of Broadband to underserved and unserved communities. We will provide contact with capable minority business enterprises, MBE's, with specific industry codes applicable to your activities.

The NBCC has over 151 chapters within the United States and we have contact with over 125,000 Black owned businesses. Our network also extends to many sister associations such as the World Conference of Mayors and we have use of space in most Black owned newspapers. We are a 501(c)(3) corporation and have been in operation since 1993.

Our newly formed Telecommunications Committee will be available to you upon request and please contact my office directly for any requests, requirements or items of interests. We look forward to a very successful venture.

Sincerely,

Harry C. Alford
President/CEO

To Whom It May Concern:

I am writing this letter to confirm the commitment of America Online to provide part of the 20% matching funds requirement for One Economy's enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Upon award of the grant, America Online commits to providing approximately [REDACTED] in support of One Economy's proposal. This in-kind contribution is in the form of hosting services and equipment supplied to One Economy on an ongoing monthly basis. The hosting support amounts to about [REDACTED] per month and covers server hardware, networking hardware, 24/7 monitoring/maintenance and connectivity to the Internet from one of our Network Operations Centers.

Please feel free to contact me if you have any questions.

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To whom it may concern:

As requested by One Economy Corporation ("OE"), I am writing to confirm that AT&T has made a commitment to contribute [REDACTED] in cash to OE. AT&T made this commitment in early 2009 in support of an effort by CTIA, the wireless industry association, to assist OE in its creation of a national wireless broadband literacy and technology program for lower income teens and their families. AT&T will pay half the [REDACTED] in 2009 and the remainder in 2010, if not sooner.

After making this commitment AT&T was made aware that OE is using this cash commitment to serve as part of OE's 20% matching funds' requirement in its proposal to the National Telecommunications and Information Administration (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption. AT&T is not participating directly or indirectly in OE's grant proposal, but AT&T does not object to OE's decision to use the cash commitment in this way.

Sincerely,

Re: Letter of Commitment for One Economy's Application to CFDA-11.557

To Whom It May Concern:

Cisco Systems, Inc. is pleased to provide a letter of support for One Economy's application for funding under the sustainable adoption area of the above application for the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP).

Cisco is committed to providing One Economy with access to the Cisco Networking Academy program to enhance the curriculum for One Economy's National Digital Connectors program. Networking Academy provides online courses, interactive tools, and lab activities to prepare individuals for IT and networking skills that will be critical to successful community adoption of broadband.

Cisco will supply the commercially available Cisco Networking Academy program to support our shared vision of sustainable adoption of broadband usage. Cisco does not separately charge One Economy for its participation in the Cisco Networking Academy.

Cisco Networking Academy estimates the current value of Cisco contributions to One Economy through their use of the Cisco Academy IT Essentials curriculum to be an estimated [REDACTED] annually, **per site**. The curriculum offers a rich combination of web-based curriculum, hands-on labs, in-depth instructor training, lab assets, support, and more. By assigning a dollar value to each of these components, we are able to estimate the total current financial value contributed. (See attached details)

Cisco and One Economy have a shared interest in expanding broadband access. Cisco is pleased to confirm its contribution to One Economy in the form of the Cisco Networking Academy.

Regards,

The Honorable Lawrence E. Strickling
Assistant Secretary for Communications and Information, and
Administrator, National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
Washington, DC 20230

Re: One Economy Sustainable Broadband Adoption Application
Broadband Technology Opportunities Program

Dear Assistant Secretary Strickling:

I am writing to confirm the commitment of the Comcast Foundation to provide a [REDACTED] cash contribution for the proposed initiatives outlined in One Economy's applications to the National Telecommunications and Information Association ("NTIA") Broadband Technology Opportunities Program ("BTOP") for Sustainable Broadband Adoption.

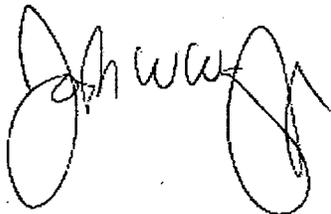

The Comcast Foundation supports organizations across America that are committed to digital inclusion. In order to be full participants in the workforce, Americans of all ages must become more proficient in using the tools and technologies of the 21st century. Our children, our families, our senior citizens all need to avail themselves of the educational, social and job-training opportunities made possible by access to broadband Internet services.

Upon award of the BTOP grant to One Economy, the Comcast Foundation commits to provide [REDACTED] in funding over a 24-month period for the initiatives set forth in One Economy's applications - specifically, [REDACTED] will support its Digital Connectors programs across the country, and [REDACTED] will help to fund public computing centers.

This contribution in support of One Economy's applications is conditioned on the understanding that any such effort will not result in the Comcast Foundation becoming subject to any requirements of the BTOP program or the Recovery Act. In the event that our understanding is incorrect, I ask that you contact me at (215) 286-7607 at your earliest opportunity.

We are delighted that you are considering One Economy's application, as the organization is demonstrably effective in promoting broadband adoption in low-income communities. Please feel free to contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Waz, Jr.", with a stylized flourish at the end.

The Honorable Lawrence E. Strickling
Assistant Secretary for Communications and Information, and
Administrator, National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
Washington, DC 20230

Re: One Economy Sustainable Broadband Adoption Application
Broadband Technology Opportunities Program

Dear Assistant Secretary Strickling:

I am writing to confirm the commitment of the Comcast Corporation ("Comcast") to provide an in-kind contribution valued at [REDACTED] for the proposed initiatives outlined in One Economy's application to the National Telecommunications and Information Association ("NTIA") Broadband Technology Opportunities Program ("BTOP") for Sustainable Broadband Adoption.

Comcast is working with organizations across America that are committed to digital inclusion. In order to be full participants in the workforce, Americans of all ages must become more proficient in using the tools and technologies of the 21st century. Our children, our families, our senior citizens all need to avail themselves of the educational, social and job-training opportunities made possible by access to broadband.

Comcast has identified One Economy as a national partner in our efforts to promote digital literacy, community service and youth leadership. One Economy has a record of success in these areas and is organized to scale up their initiatives. Comcast is working with One Economy on its "Digital Connectors" program which recruits youth from disadvantaged neighborhoods, gives them training and access to digital technology, and enlists them to help introduce the broadband Internet to members of their communities. At a recent event on Capitol Hill, we announced the Digital Connectors program to nearly 30 Members of Congress, several of whom expressed great interest in having future Digital Connectors sites launched in their districts.

Upon award of the BTOP grant to One Economy, the Comcast Corporation commits to provide an in-kind contribution of cable airtime on Comcast cable systems and networks for Public Service Announcements promoting the efforts identified in One Economy's application, with a total value of [REDACTED] over a 24-month period.

This contribution in support of One Economy's initiatives is conditioned on the understanding that any such effort will not result in Comcast Corporation becoming subject to any requirements of the BTOP program or the Recovery Act. In the event that

our understanding is incorrect, I ask that you contact me at (215) 286-7585 at your earliest opportunity.

We are delighted that you are considering One Economy's application, as the organization is demonstrably effective in promoting broadband adoption in low-income communities. Please feel free to contact me if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "David".

Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of Cricket Communications Inc. (Cricket) to support One Economy in the implementation of its programs as described in One Economy's proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Public Computer Centers.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are pleased and excited to offer our support to One Economy as it continues to expand its youth technology education and engagement program, Digital Connectors.

In support of One Economy's grant application, Cricket will commit to:

- Provide 3,000 wireless broadband modems to One Economy's Digital Connectors to support their communities' technological advancement, contingent upon the approval of Cricket's "Project Change Access" Sustainable Broadband Adoption stimulus grant.

We appreciate this opportunity to support One Economy in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and Cricket together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

To Whom It May Concern:

I am writing this letter to confirm the commitment of Duke University to provide part of the 20% matching funds requirement for One Economy's enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Upon award of the grant, Duke University commits to providing [redacted] in cash and [redacted] worth of in-kind services in support of One Economy's proposal to BTOP Sustainable Adoption. These funds will be used to:

- Provide staff support to a Digital Connectors program in Durham.
- Support computing resources for Digital Connectors as they advance broadband education.
- Managing, coordinating, and facilitating a collaborative of community organizations in support of increased broadband adoption in the Walltown neighborhood, a predominately African-American community located in underserved census areas.

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of FusionStorm, Inc. to partner with One Economy and the Broadband Opportunities Coalition in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are fully in agreement with the mission of One Economy and have long recognized the crucial role that technology can play in helping low-income individuals advance their own and their children's education, obtain job skills, learn about employment opportunities, and improve their health. We are pleased and excited to offer our support to One Economy as a national supplier of installation services and ongoing network monitoring and maintenance services.

As a partner of this grant, FusionStorm, Inc, will commit to:

- Installing computer labs and equipment in secure buildings as contracted by housing partners of One Economy.
- Installing Meraki mesh network equipment in the manner designed in cooperation with One Economy engineering staff.
- Remotely monitor all installed network to insure proper operation and internet access to residents.
- Where asked, supply site survey and network design services.

Upon award of the grant, FusionStorm certifies that the pricing it provides in support of One Economy's proposal to BTOP to support our local Digital Connector program reflects a 20% discount below standard rates for the same products and services.

We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the

support of BTOP, One Economy and FusionStorm together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

David:

I am writing this letter to confirm the commitment of Google Inc. to provide part of the 20% matching funds requirement for One Economy's enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Upon award of the grant, Google Inc. commits to providing continued in-kind support of One Economy's proposal to BTOP. These in-kind funds will be used to support One Economy's online initiatives over the course of 24 months. Since January 2006, One Economy has benefited from Google's unique in-kind donation program, Google Grants. Through Google's advertising platform, Google AdWords, One Economy has significantly increased the visibility of the Beehive (www.thebeehive.org), a self-help bilingual website, the Public Internet Channel (www.pic.tv), a next-generation, public-purpose online network that inspires, informs, and engages and Just Think (www.justthink.org), a site which provides media literacy education and media production training to youth and teachers in the Bay Area and beyond. Through the Google Grant, over 17 million low-income individuals have used online resources, tools and programming to help improve their lives.

On behalf of the Google Grants program, I can confirm that we plan to continue having One Economy as a grantee for the next 2+ years, understanding that the organization's continued participation is contingent upon following the program guidelines and policies as laid out on our website.

Please feel free to contact me if you have any questions.

Sincerely,

Chief of Staff
One Economy Corporation
1220 19th Street NW
Suite 610
Washington DC 20036

Dear Mr. Reichart:

I am writing to confirm the commitment of the National Association of Broadcasters (NAB) to assist One Economy Corporation (OE) and its partner, the Broadband Opportunity Coalition (BBOC), in promoting public service announcement (PSA) airtime on local radio and television stations across the country.

We understand that the OE/BBOC campaign will be aimed at promoting universal broadband adoption, especially among low income, minority and multilingual populations. The target audiences for this campaign can be reached very effectively by the nation's free, over-the-air broadcast media. Free, local broadcast television and radio stations reach virtually every person in the United States with daily public service programming.

We understand that the campaign will have both national and local components, and broadcast television and radio stations can easily tailor national content to suit local needs. NAB's PSA resources, many of which are available in multiple languages, are designed to assist stations in developing local public service campaigns that best meet the needs of their community.

Specifically, NAB will include OE/BBOC broadband adoption campaign spots in its monthly television PSA satellite feeds and on the NAB Spot Center Web site, www.nabspotcenter.org, from which radio and television stations download audio PSAs and PSA campaign materials. We also will encourage radio and television networks and local stations to broadcast OE/BBOC broadband adoption PSAs through regular member outreach. Our public service Web site and satellite feeds are available

Page 2

to NAB member stations and any other television or radio broadcaster that wishes to use our resources.

While it is not possible to project the number of spots that our member stations will choose to air or assess the value of the amount of airtime and other resources stations will devote to this campaign, NAB's most recent nationwide public service survey indicates that, in 2005, the average television station ran 136 PSAs per week, valued at [REDACTED] in airtime per television station per year. The average radio station ran 169 PSAs per week, which is the equivalent of [REDACTED] in airtime per station per year.¹

We welcome the opportunity to make the OE/BBOC broadband adoption campaign a featured NAB PSA campaign over the next two years and look forward to an enduring partnership on this issue of both national and local concern.

Sincerely,

A handwritten signature in black ink, appearing to read "Janet McGregor", written over a large, circular, stylized flourish.

Fax: 202-332-7511
e-mail: dhonig@crosslink.net

Dear Mr. Reichart:

This will provide a conservative estimate of the economic value of the public service announcements ("PSAs") that will be made available to One Economy pursuant to the letter to you this date from Janet McGregor, Acting President and CEO of the National Association of Broadcasters ("NAB Letter"). I am providing this valuation letter in my capacity as Executive Director of MMTC Media Brokers, a full service media brokerage MMTC has operated since 1997. MMTC Media Brokers, a member of the National Association of Media Brokers, has represented leading broadcast companies including Clear Channel Communications, CBS Radio and Max Media, and has participated in transactions valued at approximately \$1.7 billion. Pursuant to those transactions, we establish station valuations based on our thorough knowledge of broadcast practices, economics and airtime valuations.

The NAB letter states: "in 2005, the average television station ran 136 PSAs per week, valued at [REDACTED] in airtime per television station per year. The average radio station ran 169 PSAs per week, which is the equivalent of [REDACTED] in airtime per station per year."

According to the NAB's National Report on Broadcasters' Community Service, available at http://www.broadcastpublicservice.org/2008_National_Report.pdf (last visited August 1, 2009), over 80% of radio and television stations air PSAs about breast cancer and women's health, and over 80% air PSAs about drunk driving, alcohol abuse and the dangers of drug use. We may very conservatively project that one-quarter as many stations (20%) will air PSAs about broadband adoption – a matter roughly comparable in importance to health care and drug abuse - and (again very conservatively) project that these stations will each choose to air just one PSA per week about broadband adoption.

As of December 2008, there were 14,523 full power radio and 1,759 full power television stations on the air. See <http://www.fcc.gov/mb/audio/totals/bt081231.html#START> (last visited August 11, 2009). Using the NAB Letter's valuations of radio and TV station PSAs, a single PSA per week by 20% of radio stations (2,905 stations) and 20% of television stations (352 stations) would be worth [REDACTED] (television) plus [REDACTED] (radio), for a total of [REDACTED].

It is almost certain that far more than 20% of stations would broadcast One Economy's PSAs and that the PSAs would air much more frequently than once a week. Therefore, we may conclude that the NAB's commitment of PSA support may be confidently and conservatively valued at [REDACTED] per year for application toward the 20% matching funds requirement for One Economy's proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) Sustainable Adoption.

Sincerely,

David Honig

To Whom It May Concern:

I am writing this letter to confirm the commitment of the Shad Ireland Foundation to provide part of the 20% matching funds requirement for One Economy's enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Upon award of the grant, the Shad Ireland Foundation commits to providing [REDACTED] in cash support of One Economy's proposal to BTOP. This contribution will be used to create a new site--part of the Public Internet Channel network--that will provide comprehensive resources and a venue for sharing and networking for those suffering from kidney disease; and as a resource to help those at risk for kidney disease to avoid it. The Shad Ireland Foundation has selected One Economy for this work based on its time-tested approach to creating usable and useful content in a way that is easy to understand for a variety of populations. The intent of this content ultimately, is to improve health outcomes and provide life-sustaining and life-enhancing advice for this vulnerable population.

Please feel free to contact me if you have any questions.

Sincerely,

Shad Ireland

To Whom It May Concern:

I am writing this letter to confirm the commitment of Viva la Familia & Todobebe to partner with One Economy and provide an in-kind contribution of [REDACTED] in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

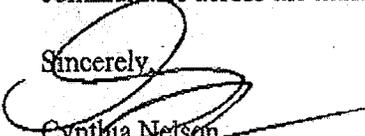

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We are pleased and excited to offer our support to One Economy as it continues to create and provide information and interactive tools that help improve the lives of individuals in low-income communities.

As a partner of this grant, Viva la Familia & Todobebe will commit to:

- Distribution of marketing materials to the Todobebe audience in a conjunction with Todobebe materials regarding our annual fiesta entitled Viva la Familia, valued at [REDACTED]
- Provide press release information regarding the content and marketing partnership between Todobebe and One Economy, valued at [REDACTED]
- Link from www.Todobebe.com to www.theBeehive.com, valued at [REDACTED]
- Provide video content and articles to One Economy to be used on their various media properties that target our shared Spanish speaking audience, valued at [REDACTED]

We appreciate this opportunity to support One Economy in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and Viva la Familia & Todobebe together will provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Cynthia Nelson
Chief Operating Officer

1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I send this letter to indicate our approval of One Economy Corporation's request to apply the grant currently under consideration by the Walmart Foundation as matching support for their proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

The Walmart Foundation has invited One Economy to submit a proposal for a national Earned Income Tax Credit (EITC) program that, in partnership with United Way of America and the National Disabilities Institute, will expand free tax preparation and filing assistance to thousands of eligible families.

In January 2009, One Economy received a [REDACTED] grant to implement a similar program and based on the success of that initiative, the Foundation has invited them to submit a proposal for the 2010 tax season. The grant, if awarded, will be used to deliver online and in person tax filing assistance through the One Economy Corporation client facing website, the Beehive (www.thebeehive.org). The program takes free tax instruction and free tax preparation software to underserved communities to increase financial and tax literacy so that families may access the EITC and other valuable low income tax credits for free. Their grant proposal will be fully considered by the Walmart Foundation's board of directors at the October 2009 meeting.

If you have any questions, I can be reached at Michelle.Gilliard@wal-mart.com or 202-434-0724.

Sincerely,

Michelle D. Gilliard, Ph. D.

To Whom It May Concern:

This letter confirms the support of the American Film Institute Digital Content Lab for One Economy's implementation program as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

The AFI Digital Content Lab is a world-class content R&D program based in Los Angeles that has incubated more than 90 advanced interactive applications during its eleven years of operation. Our team is very pleased to support One Economy in its efforts to create innovative, relevant and useful educational content for low-income Americans. As a participant in this grant, the AFI Digital Content Lab will foster the production of content and applications designed to bring important public-purpose information to underserved populations.

One Economy is a unique organization with a successful record of providing the vision and capacity to provide digital access issues for the underserved in rural and urban communities. It is an honor to collaborate with them on this important work.

common sense
media

August 10, 2009

National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Ave., NW
Washington, DC 20230

To Whom It May Concern:

As the Founder and CEO of Common Sense Media, I am writing to express my support for the proposal by One Economy and its partners, the Broadband Opportunity Coalition (BBOC) to the National Telecommunications and Information Administration (NTIA) Broadband Technology Opportunities Program (BTOP).

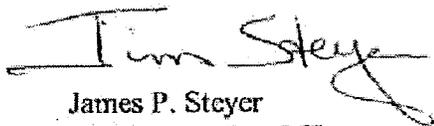

One Economy and Common Sense Media are the leading non-partisan, non-profit organizations working to ensure that families, communities and schools – especially in unserved and underserved areas – benefit from the broadband revolution.

Common Sense Media and One Economy intend to coordinate on a public education and awareness campaign to encourage broadband adoption and digital literacy in unserved and underserved areas of the country among our target population. Assuming both of our proposals are accepted by the NTIA, we will work to link our home and school outreach and education efforts to foster connected learning environments in each community. Since Common Sense's proposal focuses especially on schools, while One Economy's focuses especially on homes, linking the two efforts will maximize the benefits.

Common Sense Media and One Economy, along with our media and community partners whose support letters are included in our respective proposals, intend to collaborate wherever feasible to seek the maximum effectiveness of our programs and minimum waste of funds and other resources.

Our proposals are entirely complementary, and both highlight the unique opportunities that broadband presents for families, schools and communities across our nation. We are excited about these opportunities, and our collaborative partnership, and we hope the National Telecommunications and Information Administration will fully fund both proposals.

Sincerely,

James P. Steyer

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter in support of the application of One Economy and the Broadband Opportunities Coalition to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

One Economy provides broadband access in hundreds of affordable housing projects; a proven model for enabling people to adopt technology and the Internet into their daily lives through digital literacy programs and youth technology corps; and award-winning, multilingual, web-based tools and information about financial services, education, jobs and health care. Through this package of services, One Economy establishes broadband availability, affordability and adoption in low-income communities while empowering people to take steps to improve their lives.

The Council of Large Public Housing Authorities (CLPHA) represents nearly 60 of the largest public housing authorities across the United States. CLPHA's membership manages and administers almost half of the nation's public housing stock and 30 percent of the Section 8 voucher program.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities.

Sincerely,

Sunia Zaterman
Executive Director

Hip Hop Caucus

1112 16th St. NW, Suite 110
Washington, DC 20036

www.hiphopcaucus.org

August 10, 2009

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

On behalf of the Hip Hop Caucus, I am writing in support of the approach to sustainable broadband access and digital literacy training for low-income families that Cricket Communications, in partnership with One Economy, introduced in the "Change Access" pilot program in Portland, Ore., last fall and is proposing to expand with the support of federal Broadband Technology Opportunities Program (BTOP) funding.

The mission of the Hip Hop Caucus is to work towards ending urban poverty for the next generation. We organize young people in urban communities to be active in elections, policymaking, and service projects. Our priority issues are Urban Poverty, Urban Planning, Climate Change, Healthcare, Public Education, and Criminal Justice. The Hip Hop Caucus was founded on September 11, 2004. Over a four and a half year period, we have developed a 700,000 member national database, and created service and field teams in 48 cities across 30 states.

As you know, millions of low-income Americans, even in U.S. cities with multiple alternatives for high-speed online connections, are left on the wrong side of the digital divide because even when broadband access is available, it is not affordable.

- The Pew Internet & American Life Project reported in 2009 that 35 percent of households with annual income of \$20,000 or less had adopted broadband, versus 80 percent for households with income of \$50,000-\$75,000.
- Of reasons cited by dial-up and non-Internet users for not having broadband at home, relevance (50 percent) and price (19 percent) are top factors, according to Pew.
- Broadband access among minorities remains low even in broadband-rich urban areas: A Connected Nation policy brief in March 2009 indicated that broadband adoption among minorities in urban areas was 47 percent, versus 60 percent for non-minorities.

A critical barrier for "non-adopters" is a persistent perception among vulnerable populations that broadband access is not relevant to their lives because of lack exposure to, and awareness of, the educational, employment, health, entertainment and other benefits of adoption. Without widespread, meaningful broadband access, overlooked communities in our city face a magnifier effect of gaps in economic growth, technology innovation, improved healthcare and e-learning opportunities.

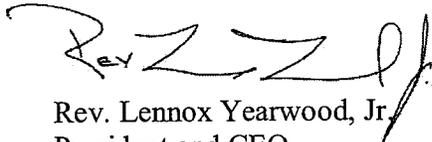

In Portland, Ore., Cricket and One Economy are providing an end-to-end solution for broadband adoption, including identifying beneficiaries, activating and installing wireless broadband for participants and ensuring, through programs such as One Economy's Digital Connectors, that community members are trained to use online technology effectively. The "Change Access" program has had major impacts on the quality of life of participants, ranging from better health care information to improved employment opportunities.

The successes of Cricket Communications and One Economy in this pilot project represent a model that should be replicated in low-income communities in our city that have been bypassed by the digital revolution because even when wireline or wireless broadband services are available, they are neither affordable nor relevant.

The Hip Hop Caucus is happy to support the Broadband Opportunity Coalition (BBOC) and its partnership with One Economy (OE) in replicating OE's successful broadband adoption initiatives nationwide. We are willing and prepared to partner with the BBOC and OE in the future because of the critical need to increase broadband adoption, particularly amongst urban and underserved populations.

We share the vision of Cricket and One Economy for vulnerable families to have the opportunity to experience the transformative benefits of affordable, sustainable broadband adoption and digital literacy training. Thus, we urge you to grant Cricket's application for funding under the BTOP program, with One Economy as a partner.

Respectfully,

A handwritten signature in black ink, appearing to read "Rev. Lennox Yearwood, Jr.", with a stylized flourish at the end.

Washington, DC 20036

Dear Rey:

It is heartening to hear about One Economy's efforts to bring the resources and the power of the Internet to the people who need it most. Thank you for the opportunity to be a part of this important work. We are very happy to confirm our commitment to be a part of one of the nation's most promising efforts to enable people to improve their lives.

As you know, our foundation's efforts are rooted in community, focusing primarily on health, including issues such as autism and prenatal care. Needless to say, finding innovative ways to connect low-income people and communities of color to much-needed information speaks straight to our hearts.

We know that helping inform communities about the importance of the Internet, inspiring and engaging through your youth program, Digital Connectors, and promoting the availability of critical online resources will no doubt change people's lives; we are honored to help disseminate this information and work with you on this innovative and essential effort.

It is a privilege to be involved as much as we can in these efforts including reaching out to our peers in entertainment and professional sports to encourage their engagement in this important work.

We look forward to working with you and Jessica Laufer and our colleagues at Laufer Green Isaac as we actively set out to reshape our world for the better by leveraging the power of technology.

Sincerely,

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
HCHB, Room 4812
Washington, DC 20230

To Whom It May Concern:

I am writing this letter to confirm the commitment of the National Asian Pacific American Caucus of State Legislators ("NAPACSL") to partner with One Economy in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Public Computer Centers and Sustainable Adoption.

Like One Economy, we are deeply committed to expanding broadband access and adoption to communities who need it most. We are pleased and excited to offer our support to One Economy, as it creates and expands Public Computer Centers and drives Sustainable Adoption through a national media campaign and the expansion of its widely-acclaimed Digital Connector program.

As a partner to this grant, NAPACSL will commit to:

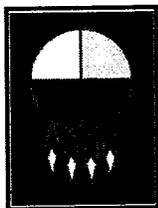

- A national letter of endorsement
- Appearances of members in Public Service Announcements and at local events supporting Sustainable Broadband Adoption

The NAPACSL, which is comprised of 98 state legislators from throughout the nation, is charged with informing, educating and promoting the civic participation of Asian Pacific Americans ("APA") in the political and electoral process at the state and local levels. There have never been more APA state legislators than there are today.

We appreciate this opportunity to support One Economy in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and NAPACSL together will significantly expand access to broadband service in communities and provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

President, NAPACSL

- A national letter of endorsement
- Appearances of members in Public Service Announcements and at local events supporting Sustainable Broadband Adoption

NCNASL's primary mission is to provide a forum for discussion and increased communication among Native American legislators; increase awareness of the diverse Native American cultures in the United States; support the establishment and maintenance of state-tribal communications to encourage open dialogues, understanding and cooperation; and act as an advisory body for the National Conference of State Legislatures on issues affecting Native Americans. NCNASL collaborates with the National Black Caucus of State Legislators and the National Hispanic Caucus of State Legislators on issues of common interest. NCNASL is currently comprised of 78 members from

We appreciate this opportunity to support One Economy in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and NCNASL together will significantly expand access to broadband service in communities and provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

**Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
HCHB, Room 4812
Washington, DC 20230**

To Whom It May Concern:

I am writing this letter to confirm the commitment of the National Hispanic Caucus of State Legislators ("NHCSL") to partner with One Economy in support of the implementation of its programs as described in the enclosed proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Public Computer Centers and Sustainable Adoption.

Like One Economy, we are deeply committed to expanding broadband access and adoption to communities who need it most. We are pleased and excited to offer our support to One Economy, as it creates and expands Public Computer Centers and drives Sustainable Adoption through a national media campaign and the expansion of its widely-acclaimed Digital Connector program.

As a partner to this grant, the NHCSL will commit to:

- a national letter of endorsement
- appearances of members in Public Service Announcements and at local events supporting Sustainable Broadband Adoption

The NHCSL is the preeminent organization serving and representing the interests of Hispanic state legislators from all states, commonwealths, and territories of the United States. Our mission is to serve as a catalyst for joint action on issues of common concern to all segments of the Hispanic community; a forum for information exchange and member networking; an institute for leadership training; a liaison with sister U.S. Hispanic organizations throughout the country; a promoter of public/private partnerships with business and labor; and a partner with

Hispanic state or provincial legislators and their associations representing Central and South America.

We appreciate this opportunity to support One Economy in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities. With the support of BTOP, One Economy and NHCSL together will significantly expand access to broadband service in communities and provide broadband education, awareness, training, and support in communities across the nation.

Sincerely,

Joseph E. Miró
President, NHCSL

Lawrence E. Strickling
Assistant Secretary for Communications and Information and
Administrator, National Telecommunications and Information Administration (NTIA)
U.S. Department of Commerce
1401 Constitution Ave., NW
Washington, DC 20230

Dear Mr. Strickling,

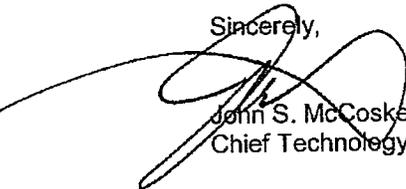

As the Public Broadcasting Service (PBS) and eight member stations submit our proposal for the **PBS Broadband Communities** program under the BTOP Sustainable Adoption category, we wish to express our support for One Economy and the Broadband Opportunity Coalition (BBOC) on behalf of One Economy's proposal to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

Our organizations believe the two applications are complementary to one another in the strategies and tactics they intend to employ in extending the benefits of broadband to technologically vulnerable populations, driving demand for broadband, and stimulating the economy. We believe that there will be little or no duplication of effort.

Indeed, PBS, One Economy and our partners intend to collaborate wherever feasible to seek the maximum effectiveness of our programs and minimum waste of funds and other resources. PBS and One Economy, along with its partners intend to share content and leverage one another's distribution platforms.

PBS and our participating member stations are pleased to have the support of One Economy and are happy to participate with and support One Economy's and the BBOC's efforts to overcome barriers to broadband adoption and to maximize the opportunities inherent in the technology itself.

Sincerely,

John S. McCoskey
Chief Technology Officer

NATIONAL HOUSING CONFERENCE

Conrad Egan

Broadband Technology Opportunities Program
National Telecommunications and Information Administration
U.S. Department of Commerce
HCHB, Room 4812
1401 Constitution Avenue, NW
Washington, DC 20230

To Whom It May Concern:

I am writing this letter in support of the application of One Economy and the Broadband Opportunities Coalition to the National Telecommunications and Information Association (NTIA) Broadband Technology Opportunities Program (BTOP) for Sustainable Adoption.

One Economy provides broadband access in hundreds of affordable housing projects; a proven model for enabling people to adopt technology and the Internet into their daily lives through digital literacy programs and youth technology corps; and award-winning, multilingual, web-based tools and information about financial services, education, jobs and health care. Through this package of services, One Economy establishes broadband availability, affordability and adoption in low-income communities while empowering people to take steps to improve their lives.

For more than 75 years, the nonprofit National Housing Conference (NHC) has been the *United Voice for Housing*. A membership drawn from every industry segment forms the foundation for NHC's broad, nonpartisan advocacy for national policies and legislation that promote suitable housing in a safe, decent environment.

Like One Economy, our organization is deeply committed to expanding broadband access and adoption to communities who need it most. We appreciate this opportunity to support One Economy and the Broadband Opportunities Coalition in its endeavor to continue to expand its record of success in digital access issues for the underserved in rural and urban communities.

Sincerely,

Conrad Egan

Re: Letter of Support

Dear Mr. Ramsey:

This is a letter to confirm the commitment of The World Conference of Mayors, Inc. (WCM) to assist One Economy Corporation and its partner, the Broadband Opportunity Coalition (BBOC), in its attempt to expand sustainable adoption of Broadband to rural communities. We will be glad assist you in any way possible with our network of elected and appointed local public officials.

The WCM is a non-profit organization which has over 5,000 elected and appointed officials worldwide of every racial and ethnic group. Furthermore, the WCM is committed to the implementation of policies that support the needs and aspirations of the African American community. Our network also includes the National Policy Alliance (NPA) which gives voice to more than 9,500 African American elected officials, and more than 3 million African American government employees who serve the nation.

Please feel free to contact me directly at 334-558-3907, if I can be of service. We look forward to working with you and a successful partnership.

Yours Truly,

The Honorable Johnny Ford
