Letter of Commitment

Legal name of applicant organization: The City of Philadelphia
Legal name of partner organization: The Free Library of Philadelphia Foundation
Partner DUNS number: 868356320
Mailing address: 1901 Vine Street, Suite 400, Philadelphia, PA 19103
Partner Web address: www.freelibrary.org
Partner Contact Name: Jim Pecora
Title: Chief Technology Officer
Telephone Number: 267.997.4817

Partners Key Roles and Responsibilities in Project (if proposed project receives full funding):

The Free Library of Philadelphia will expand free computer service and training by creating a computer TechMobile with six laptops and mobile broadband and a Portable Outpost Computer Lab with 12 laptops. The TechMobile and the Portable Outpost Computer Lab will provide broadband Internet Access to locations that do not have the capacity or space for a Public Computing Center.

The Free Library of Philadelphia will hire 3 part-time positions to carry out responsibilities of this contract and will ensure that staff is trained adequately and statistics are collected.

The Free Library of Philadelphia will ensure that the mobile units meet their goals, set at roughly 313 people during the business week and 20 hours of open computer access per week for a total of 4,560 hours of open access during the grant period as outlined in the narrative.

The Free Library of Philadelphia will offer 900 trainings during the grant period. Trainings will include general computer skills, as well as connecting computer literacy to other prevailing Philadelphia needs such as job readiness and targeted computer skills for seniors.

The Free Library of Philadelphia will participate in meetings of the Strategic Planning Council once a month.

The Free Library of Philadelphia will provide the City of Philadelphia Project Manager with financial and narrative information on a quarterly basis to include in grant reports to the NTIA.

The Free Library of Philadelphia will track all in-kind contributions, including staff time, and is also responsible for tracking this information for all included partners.

If The Free Library of Philadelphia subcontracts with any community organization or vendor using funding from this grant, the Library will be responsible for ensuring that each subgrantee adheres to applicable federal laws and regulations.

ASSURANCES - NON-CONSTRUCTION PROGRAMS

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0040), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant, I certify that the applicant:

1. Has the legal authority to apply for Federal assistance and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project cost) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States and, if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§4728-4763) relating to prescribed standards for merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).

6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and, (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply, as applicable, with provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.); (f) conformity of Federal actions to State (Clean Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93-205).

14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. §§2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§4801 et seq.) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.

3/8/10
Sites in Areas with Below Average Internet Access in the Home
Based on Census Block Group level data - Total population below average = 442,672 (BG count)

Mapped by the Free Library of Philadelphia
pecora 7.25.09 - revised 3.11.10
Based upon Knight Center 2008 MRI data

Legend - Below Average Internet Access

- 30% to 34.9% - household has internet access
- 35% to 39.9% - household has internet access
- 40% to 47.52% - household has internet access

Based on raw MRI data from Knight Center by block group (BG). There can be up to 9 BGs per tract. The MRI study states that Philadelphia has 41% of homes that have NO internet access and defines below average as a BG that has "less than" 47.52% of homes with access to the internet. The total population of the block groups shown in this map is 442,672 and does NOT represent the total population of the tract. Note that tracts were not color coded with more than one color even though some of them have multiple BGs with different levels of adoption - generally the lower measure was used for the color code.
March 9, 2010

Lawrence E. Strickling  
Assistant Secretary for Communications and Information  
U.S. Department of Commerce  
1401 Constitution Ave.  
NW Washington, DC 20230

Dear Mr. Strickling,

I am writing to express my strong, enthusiastic support for the Philadelphia Freedom Rings-Public Computer Center proposal being submitted for a Broadband Technology Opportunities Program grant under the American Recovery and Reinvestment Act (ARRA).

Philadelphia is a city challenged by high poverty rates, high numbers of homeless people, and heavy dependence on public benefits and is also one of its least wired, with 40% of its population with no Internet access at home. The City of Philadelphia aims to establish a network of 60 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

Asociación Puertorriqueños en Marcha (APM), a Latino based nonprofit with a 40-year history of helping families achieve their fullest potential. Every year we serve 10,000 individuals, providing them with health and human services, affordable housing and education.

Through this grant, APM will be able to add 6 systems, create jobs, and serve an additional 34 individuals in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. I urge the NTIA to award this grant with all possible speed.

Sincerely,

Jennifer Rodríguez, Deputy VP Programs

Lawrence E. Strickling
Assistant Secretary for Communications and Information
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Avenue, NW
Washington, DC 20230

Dear Mr. Strickling:

I am writing to express my strong, enthusiastic support for the Philadelphia Freedom Rings—Public Computer Center proposal being submitted for a Broadband Technology Opportunities Program grant under the American Recovery and Reinvestment Act (ARRA).

Philadelphia is a city challenged by high poverty rates, high numbers of homeless people, and heavy dependence on public benefits and is also one of its least wired, with 40% of its population with no internet access at home. The City of Philadelphia aims to establish a network of 60 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

People’s Emergency Center
325 N. 39th Street
Philadelphia, PA 19104

Through this grant, People’s Emergency Center will be able to add 131 systems, create jobs, and serve an additional 806 families in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. I urge the NTIA to award this grant with all possible speed.

Yours truly,

Gloria Guard
President
March 9, 2010

Mr. Lawrence E. Strickling
Assistant Secretary for Communications and Information
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Ave.
NW Washington, DC 20230

Dear Mr. Strickling:

On behalf of Congreso de Latinos Unidos, I am writing to express my strong, enthusiastic support for the Philadelphia Freedom Rings—Public Computer Center proposal being submitted for a Broadband Technology Opportunities Program grant under the American Recovery and Reinvestment Act (ARRA).

Philadelphia is a city challenged by high poverty rates, high numbers of homeless people, and heavy dependence on public benefits and is also one of the least wired, with 40% of its population with no Internet access at home. The City of Philadelphia aims to establish a network of 60 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

Congreso de Latinos Unidos, a community-based nonprofit organization, strengthens Latino communities through social, economic, education, and health services, leadership development and advocacy. Congreso has been providing high quality services to the Latino community of Eastern North Philadelphia for more than 30 years. However, this community continues to face many challenges to reaching economic self-sufficiency. Congreso’s goals are for young people to graduate from high school and attend at least two years of postsecondary education, and for adults to obtain a job with a living wage. To reach these goals, individuals and families must be safe and healthy. In order to remove any barriers to achieving these goals, Congreso provides an integrated menu of education, training, employment, family support, and health and wellness services for the whole person. In Fiscal Year 2009, Congreso served nearly 17,000 individuals.

Through this grant, Congreso will be able to add 21 systems, create jobs, and serve an additional 2,430 people in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. I urge the NTIA to award this grant with all possible speed.

Sincerely,

Nicholas D. Torres
President

Lawrence E. Strickling
Assistant Secretary for Communications and Information
National Telecommunications and Information Administration
U.S. Department of Commerce
1401 Constitution Ave.
NW Washington, DC 20230

Dear Mr. Strickling,

I am writing to express my strong, enthusiastic support for the Digital Philadelphia - A Public Computer Network proposal being submitted for a Broadband Technology Opportunities Program grant under the American Recovery and Reinvestment Act (ARRA).

Philadelphia is a city challenged by high poverty rates, high numbers of homeless people, and heavy dependence on public benefits and is also one of its least wired, with 40% of its population with no Internet access at home. The City of Philadelphia aims to establish a network of 60 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

The City of Philadelphia has been offering public recreation programming for over 100 years, and has been operating the Philadelphia Department of Recreation since 1952. A core principle of the Department of Recreation is to maintain a presence of active recreational opportunities and equal access in all Philadelphia’s neighborhoods. The department strives to provide athletic, cultural and educational programs that engage individuals from youth to senior citizens so that our facilities are a vibrant and dependable part of every community. Last year the Department of Recreation operated 150 staffed facilities across the city and served 640,951 participants in a variety of programs conducted by recreation staff and community volunteers throughout the year. Given the department’s history of providing public services and the public’s dependence on the department to provide core neighborhood services, it makes perfect sense to utilize these facilities as Public Computing Centers.
Through this grant, the Department of Recreation will be able to add 188 systems, create jobs, and serve an additional 6,400 people in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. I urge the NTIA to award this grant with all possible speed.

Sincerely,

Leo Dignam
Deputy Commissioner
Philadelphia Recreation Department

1401 Constitution Ave.  
NW Washington, DC 20230

Dear Mr. Strickling,

I am writing to express my strong, enthusiastic support for the Philadelphia Freedom Rings-Public Computer Center proposal being submitted for a Broadband Technology Opportunities Program grant under the American Recovery and Reinvestment Act (ARRA).

Philadelphia is a city challenged by high poverty rates, high numbers of homeless people, and heavy dependence on public benefits and is also one of its least wired, with 40% of its population with no Internet access at home. The City of Philadelphia aims to establish a network of 60 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

With more than 900 public access computers that were used 1,037,818 times last year, strong broadband bandwidth, wireless in ever library in our system, and computer training workshops offered in labs at libraries throughout the city, the Free Library is the largest provider of free computer and Internet access in the city. However, there is such a demand for computer and Internet access and training in Philadelphia that workshops are often filled to capacity, and there is nearly always a wait for public access computers in most library locations. Through this grant, the Free Library of Philadelphia will be able to offer mobile services through a TechMobile and portable computer lab, create new jobs, and serve an additional 25,000 people in our community.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. I urge the NTIA to award this grant with all possible speed.

We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

Prevention Point Philadelphia is a public health organization whose mission is to decrease the spread of HIV/AIDS, Hepatitis C and other blood-borne diseases among the most vulnerable and overlooked populations of Philadelphia – the homeless, the uninsured, the injection drug users and sex workers. Last year, we served more than 7,000 individuals through our core services, which include basic healthcare, prevention education, legal advocacy, and syringe exchange.

Through this grant, Prevention Point Philadelphia will be able to add four systems, and serve an additional 40 people each day in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

ACHIEVEability is a 29 year old organization that serves the West Philadelphia Community. ACHIEVEability is making great progress in helping single parent families end the cycle of poverty and homelessness. ACHIEVEability has aggressively invested in providing affordable housing and redeveloping over 200 units of deteriorated housing inventory in its community. Through its Neighborhood Community Office and Computer Learning Center, ACHIEVEability has begun to change the physical appearance of the 60th Street corridor bounded by Market and Arch Streets.

Through this grant, ACHIEVEability will be able to add systems, create jobs, and serve more than an additional 500 people in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Dear Mr. Strickling,

I am writing to express my strong, enthusiastic support for the Philadelphia Freedom Rings—Public Computer Center proposal being submitted for a Broadband Technology Opportunities Program grant under the American Recovery and Reinvestment Act (ARRA).

Philadelphia is a city challenged by high poverty rates, high numbers of homeless people, and heavy dependence on public benefits and is also one of its least wired, with 40% of its population with no Internet access at home. The City of Philadelphia aims to establish a network of 80 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

OIC has been offering “office technology” training for over 30 years, understanding its importance as job/career preparation. Increasingly, the use of a computer is essential to our professional and personal lives.
Philadelphia Opportunities Industrialization Center, Inc.

Our interest in those who have participated in our various computer-based training options contributed to our realization and acceptance that there is a "digital divide" and the Broadband Initiative holds the promise of bridging that divide and connecting people, neighborhoods, and communities. And while there are a variety of community-based computer labs that are available to residents, computer access gaps still exist. Located in the neighborhoods where such gaps exist are: residential service programs for youth; drug/alcohol abuse programs; both residential and outpatient services; after school programs; and smaller faith-based institutions. This classrooms will become an integral part of our community education initiative, which focuses on basic skills, workforce development, and technology trainings.

Through this grant, Philadelphia OIC will be able to add 25 mobile laptop systems (1 Macbook Cart), create jobs, and serve an additional 550 people (per week) in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. I urge the NFA to award this grant with all possible speed.

Sincerely,

The City of Philadelphia aims to establish a network of 60 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

There are 5,000 taxi workers in Philadelphia, most are working class poor. 85% of these workers are first generation immigrants with little English skills that affect their ability to find better work. Because taxi drivers work in isolated conditions and where each cab is in competition with each other, TWA-PA began developing strategies to break down the isolation and educating the community on the systemic problems we face. To this end, we are currently broadcasting a workers rights radio show, publishing a quarterly newsletter, hosting an interactive website and listserv and holding general meetings with drivers on a regular basis.

Through this grant, TWA will be able to add at least 6 systems and serve an additional 1,000 people in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. Dear Mr. Strickling:

I am writing to express my strong, enthusiastic support for the Philadelphia Freedom Rings-Public Computer Center proposal being submitted for a Broadband Technology Opportunities Program grant under the American Recovery and Reinvestment Act (ARRA).

Philadelphia is a city challenged by high poverty rates, high numbers of homeless people, and heavy dependence on public benefits and is also one of its least wired, with 40% of its population with no Internet access at home. The City of Philadelphia aims to establish a network of 60 plus Public Computing Centers that will reach over 20,000 vulnerable citizens in Philadelphia and expand broadband access to chronically underserved neighborhoods. We will accomplish this by investing in a coordinated system that utilizes city facilities and identified nonprofits already located in challenged neighborhoods to develop a network of Public Computing Centers that will provide broadband access to our poorest citizens.

The YMCA of Philadelphia & Vicinity was founded on June 15, 1854 in Jayne’s Hall on Sansom Street by George H. Stuart, a prominent Philadelphia businessman and importer. It has grown into an association of eleven branches and 85 program sites serving more than 140,000 individuals in Delaware, Montgomery and Philadelphia counties by providing: childcare, summer day camp, youth programs, health and wellness, aquatics, and adult education programs. We are the largest non-profit provider of childcare in the Delaware Valley.

The YMCA of Philadelphia & Vicinity is a nationally recognized and leading organization engaged in a number of national, state-wide and local efforts. We are a Global Center of Excellence committed to becoming a diverse and inclusive global community; we are the convening organization leading a Center for Disease Control (CDC) funded coalition promoting food and fitness policy changes in schools; we are a part of the advisory committee for the Y-USA on expanding services for infants and toddlers within Y early childhood education programs; and we are also serving as one of 10 cohorts addressing diversity within Y early childhood programs and “welcoming Hispanic families into early childhood programs.”

Through this grant, the YMCA of Philadelphia & Vicinity will be able to add 5 systems, create jobs, and serve an additional 1,000 people in our community. We are enthusiastic about the potential to expand and build on our existing initiatives, with hopes of serving the many individuals in our community who are on the opposite side of the Digital Divide.

Our Mission: To translate the principles of the YMCA’s Christian heritage into programs that nurture children, strengthen families, build strong communities and develop healthy spirits, minds and bodies for all.

A United Way Agency
The single most important determinant of the effectiveness of a digital inclusion program is its integration with already-existing community structures and networks. Taking into mind the drastic need that Philadelphia has for broadband access, this proposal aims to create a coordinated network of Public Computing Centers in community organizations, the recreation centers, the Free Library, and homeless shelters. I urge the NTIA to award this grant with all possible speed.

Sincerely,

John F. Flynn

Re: ENDORSEMENT OF BROADBAND TECHNOLOGY OPPORTUNITIES PROGRAM FUNDING FOR PHILADELPHIA FREEDOM RINGS NETWORK

Dear Mr. Strickling,

I am writing in my capacity as Chair of Temple University’s Department of Broadcasting, Telecommunications, and Mass Media (BTMM) to endorse the Philadelphia Freedom Rings Project proposal to obtain funding through the Broadband Technology Opportunities Program as a multiple comprehensive community infrastructure, sustainable broadband adoption, and public computer center application submission for the City of Philadelphia.

BTMM is recognized as having produced some of the finest media professionals in the nation. Our curriculum explores media as complex cultural environments — artistic, commercial, technological, and philosophical — central to a global community shaped by information networks. Using the latest technologies and teaching methods, we inspire students to create, produce, evaluate, and manage media messages and enterprises for the evolving media world. We combine creative expertise with theoretical knowledge in an academic vision that promotes integrity and innovation, leadership and entrepreneurship, and self-expression and reflective thinking, in a collaborative learning experience. The mission of our program is to prepare students to become responsible communicators able to create, critique and analyze media content designed for audiences in a global society.

The Philadelphia Freedom Rings Project is an exciting and innovative project that highly consistent with our program’s own mission. As such, the BTMM hopes to serve as a partner at the new state-of-the-art educational television studio, Freedom Rings Network Operating Center, through the elaboration of internships and coursework designed to help educate, train, and interact with underserved populations in the production of community media programs, original online content, and community
awareness campaigns. This content will be distributed through the city wide broadband portal and Wilco's WPHA-TV.com, as way to spur engagement of broadband adoption throughout Philadelphia's economically distressed neighborhoods.

In closing, we fully support the project's goal of stimulating innovative broadband adoption for underserved residents within the City of Philadelphia, and look forward to serving as a partner.

Sincerely,

Patrick D. Murphy, PhD

Dear Secretary Lawrence E. Strickling,

The New America Foundation’s Open Technology Initiative commits to serve as a partner in the City of Philadelphia’s Department of Technology Public Computer Center proposal through the granting period if the project is awarded by the National Telecommunications and Information Administration (NTIA).

The New America Foundation’s, Open Technology Initiative (OTI) formulates policy and regulatory reforms to support open architectures and open source innovations; and facilitates the development and implementation of open technologies and communications networks. OTI promotes affordable, universal, and ubiquitous communications networks through partnerships with communities, researchers, industry, and public interest groups. OTI is committed to maximizing the potentials of innovative open technologies by studying their social and economic impacts—particularly for poor, rural, and other underserved constituencies.

OTI was also extensively involved assisting the public in understanding the requirements and rules for applying for broadband deployment and adoption funding from the NTIA’s Broadband Technology Opportunities Program fund (BTOP) and Rural Utilities Services Broadband Infrastructure Program. We have provided on-the-ground support for numerous proposals and consulted on dozens more in both funding rounds.

OTI has provided substantial in-kind support to help the Department of Technology (DOT) with their application to BTOP. In addition to working directly with DOT to expand its organizational capacity necessary to secure funding from BTOP for broadband adoption projects in Native communities, OTI is advising DOT on issues related to applying for digital inclusion program funding. This and other assistance has included:

- Identifying priorities and opportunities within BTOP;
• Creating application guides for the individual BTOP and BIP funding pools:
  1. Infrastructure, 2. Public Computer Centers, and, 3. Sustainable Broadband Adoption;
• Explicating the application process and eligibility requirements, including identifying roles, responsibilities, and task needed to complete each application, providing a sample timeline for how long each task should be expected to take, and developing a concise listing of all needed background and application documents that would need to be gathered and created;
• Assisting DOT to develop strategies to build local and national coalitions around the project;
• Assisting with the development of the proposal, including inclusion program strategies, financial analyses, grant writing and other related assistance needed to complete DOT’s application; and,
• Assistance with application narratives.

Culminated, these services are valued at $150,000 and are donated as an in-kind match for assistance in preparing the application.

Over the next two years, OTI’s partnership with DOT will continue to ensure the successful implementation of this Sustainable Broadband Adoption proposal. DOT and OTI will cooperate on program development and implementation, research, analysis and evaluation. OTI will serve as an information resource to DOT on best practices for digital inclusion projects and programs to facilitate broadband adoption and technology education on unserved native lands. Project responsibilities will include:

1. Assist with Program Implementation
   • Work with DOT and Dr. Kate Williams to develop assessment strategy approach and implementation plan that includes a framework for collecting information, including what data to collect utilizing the Data Engine for Policy Research (DEPR);
   • Assist with the development of consistent and repeatable community evaluations and needs assessments;
   • Advise on appropriate technology for programs, including hardware, software and networking equipment;
   • Advise on development of curriculum for technology and multimedia training; and,
   • Advise with the completion of project goals.

2. Evaluation of Program
   • Effectiveness of technology use, and advise as needed;
   • Evaluation of Demand; and,
   • Effectiveness of awareness campaign.

3. Program Reporting
   • Assist with development of progress and evaluation reports;
   • Assist with the development of case studies to compare project sites;
• Assist with the development of a follow-up report to “The Philadelphia Story” that incorporates data from the project; and,
• Provide a forum for DOT reports related to project, including hosting policy events and helping distribute the reports.

OTI’s continued involved with DOT media will be possible by $500,000 in funding through this proposal, paid over two years.

DOT and OTI have also worked extensively to elevate the urban Philadelphian voice in the National Broadband Plan discussion. Collaborating to file multiple comments as well as working with the Federal Communications Commission to develop proposals to meet the needs of urban populations in the forthcoming plan.

The Open Technology Initiative looks forward to continuing working with the City of Philadelphia’s Department of Technology in directing broadband intervention to close the digital divide in Philadelphia’s lowest Internet adoption areas.

Sincerely,

Sascha Meinrath
Director, Open Technology Initiative
