[REDACTED]

For 12 years, I have actively been involved in the Telecommunications industry with experience ranging from new construction, long haul fiber projects to FTTH projects. I have managed both field operations and new construction projects in the fiber telecommunications industry. I am very passionate and dedicated, always seeking new opportunities to further my knowledge of the Telecommunications industry. My goal of utmost customer satisfaction has been achieved through efficiency and effectiveness of systems, quality of work and the timely completion of projects.

Accomplishments:

UTOPIA , Director of Outside Plant

While at UTOPIA, I have successfully implemented a maintenance program, reducing our maintenance costs and ensuring a more reliable performance of the network. I directed the complete network build in Tremonton City as well as other partial build outs to anchor institutions located within the reach of our fiber network. I have written RFP's to secure the most competent, effective contractors and vendors and employed significant engineering concepts creating added benefit to the network. Additionally, I am responsible for the maintenance and control of the Field Operations budget and any new capital builds.

IProvo, Field Operations Manager

I was accountable for the planning and designing of the Fiber Optic Infrastructure for the IProvo Network. This encompassed both new builds and the relocation of existing infrastructure. While at IProvo, I oversaw the completion of the network build out to include over 30,000 addresses. Other responsibilities at IProvo included maintaining the field services budget, management of field technician supervisors, and the supervision of fiber splicing for IPROVO and other city departments. Under my management, field services also maintained the current infrastructure of the IProvo network and the SCADA network for the energy department.

Winn Caribe Communications, Fiber Splicer/Aerial Foreman

While working for Winn Caribe, I completed fiber splicing for the Comcast cable upgrade in four different cities. Aerial crews under my supervision also placed aerial strand, fiber, and coaxial cable along the Wasatch front in Utah.

Broadwing Communications, Final Acceptance Supervisor

While at Broadwing, I was in command of several ground construction and fiber splicing crews. In preparation for final cable acceptance of the network area, I managed the collection and submission of area test and trenching data. Major accomplishments include: Long haul fiber project supervision from Denver to Salt Lake City. Directed a build from Houston to San Antonio. Assisted in the completion of multiple OPGW fiber rings around the bay area in California with PG&E. Spliced fiber for several interconnections in downtown San Francisco. Assisted on an ADSS fiber build in Arizona for the SRP project. Established warehouse facilities in El Paso for a long haul fiber build.
